CYBERFEED for CERTs

Cyberfeed is AnubisNetworks threat intelligence platform that allows organizations to obtain actionable and contextualized insights into security threats.

THE NEED FOR ACTIONABLE INTELLIGENCE

CERTs need high-quality and actionable information to defend a nation's critical infrastructure. Cyberfeed enables CERTs to leverage threat intelligence that has low false-positive rates and enriched event information. Additionally, organizations can put this data into action through instant sharing of infection details and remediation information to critical infrastructure organizations. Cyberfeed easily integrates with the most common incident management systems.

Cyberfeed empowers incident response teams to actively monitor and send accurate reports to constituents and gain intelligence on the country-level threat landscape.

INFECTION DETECTION

Intelligence on infections and compromised systems.

SOCIAL AWARENESS

Monitor activity on social sites to preemptively establish new attack vectors.

COMPROMISED SYSTEMS

Malware analysis of websites, files and email.

EMAIL ECOSYSTEM

Understand spam campaigns and compromised messages.

KEY BENEFITS

Understand countrywide threat landscape and emerging infection activity

Identify riskiest critical infrastructure sub sectors within portfolios

Instantly provide infection details and remediation information to critical infrastructure providers

CONTACTS

PORTO
Address
UPTEC, Rua Alfredo Allen 455/461,
Sala EC.3.12, 4200-135 Porto,
Portugal

LISBON
Address
Av. D. João II, Lote 1.07.2.1, 4th Floor,
Parque das Nações, 1998-014, Lisbon,
Portugal

BOSTON
Address
125 CambridgePark Drive
Suite 204, Cambridge, MA
02140l
