

SAP® Strategy Management

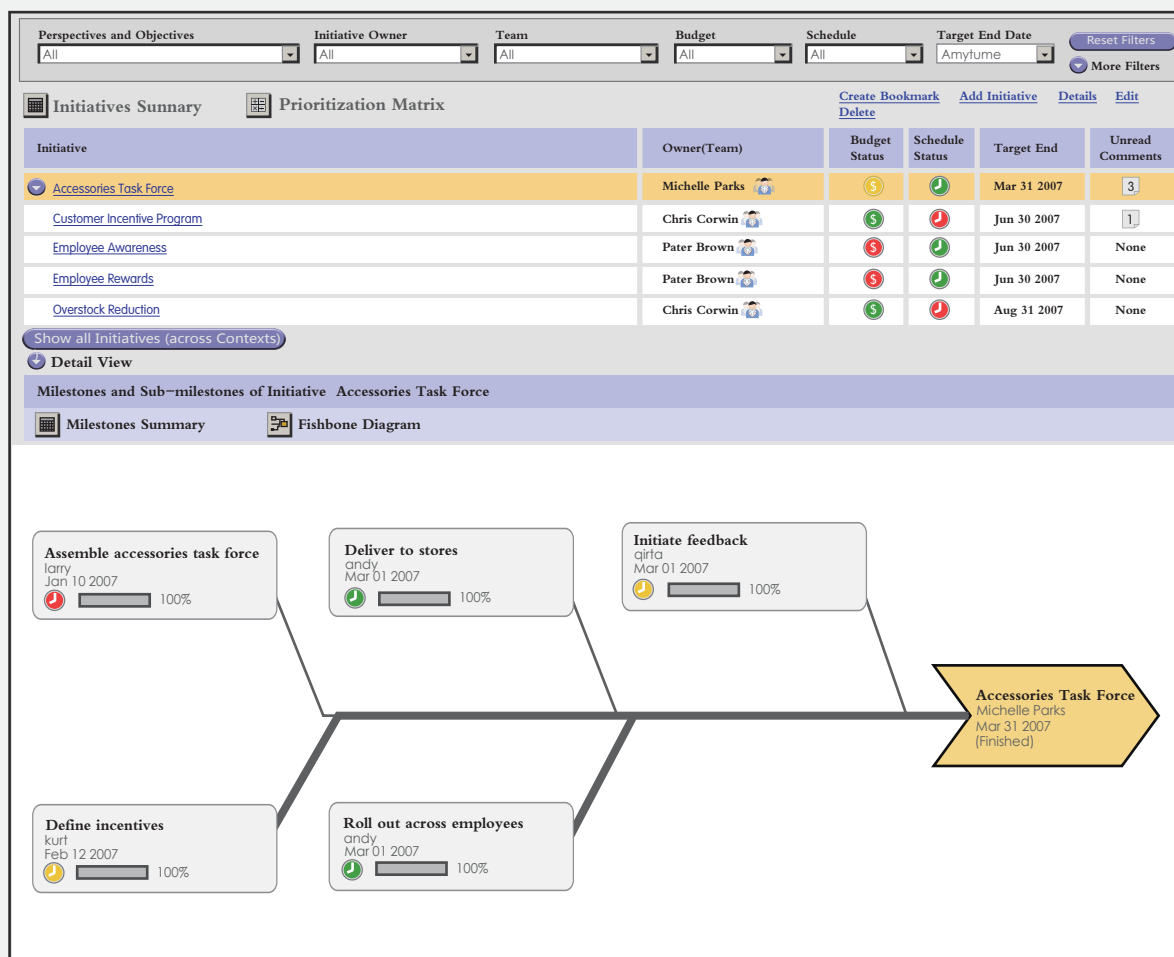

SAP® Strategy Management

SAP Strategy Management closes the gap between strategy and execution by identifying and properly resourcing key initiatives. This solution aligns all your teams with organization goals, initiatives and operational indicators. It helps you communicate plans and objectives, align business units and allocate resources to key priorities, monitor and report on progress and pro-actively take action when issues arise. It also fosters accountability by linking strategic goals, metrics, and progress to employee actions.

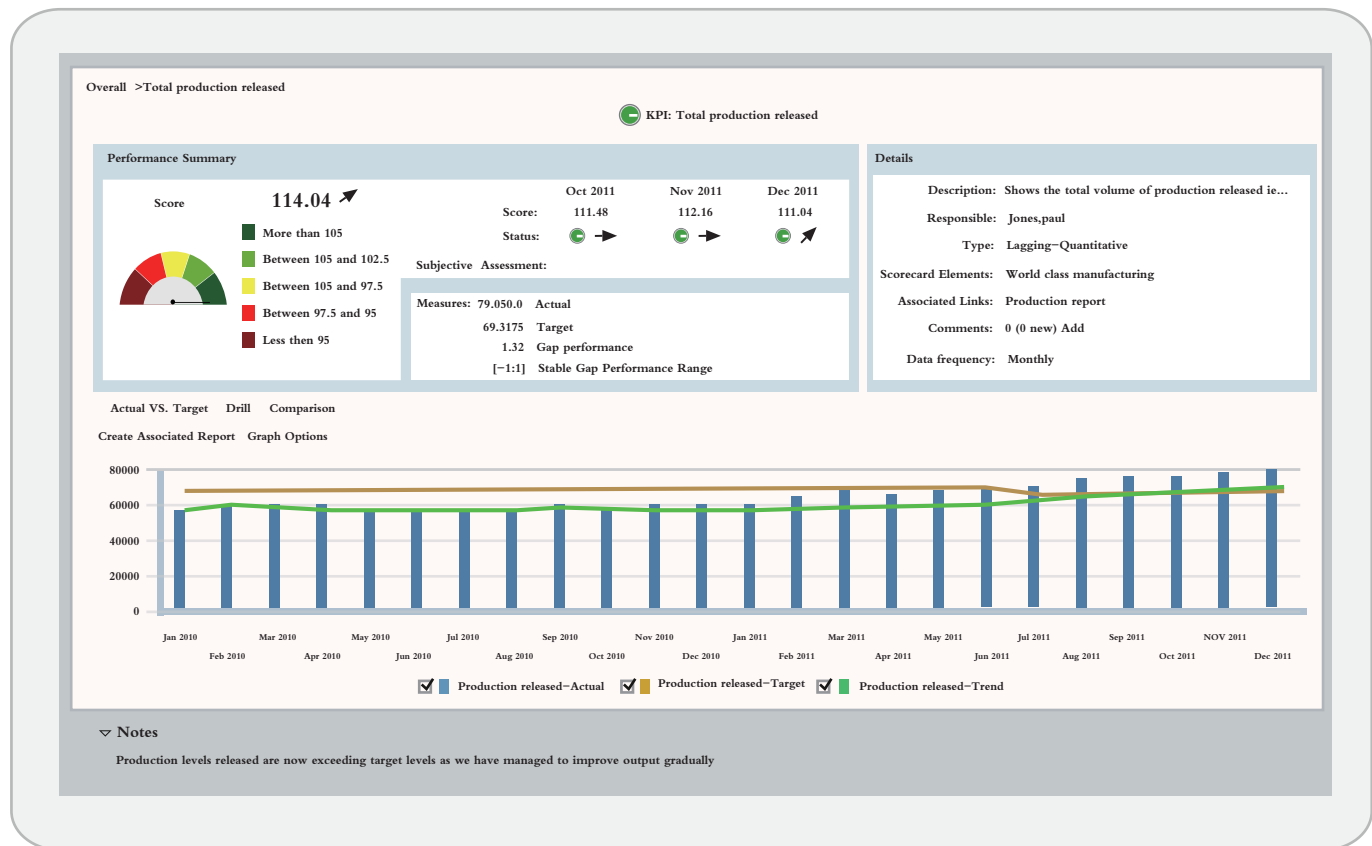

SAP Strategy Management addresses the operational needs of your whole team – from executives to front-line workers.

- For executives, it provides the tools to communicate and manage goals, initiatives and metrics from initial definition to completed execution.
- For managers, department heads, and line workers, it provides actionable plans.
- SAP Strategy Management leverages collective knowledge and helps everyone make informed decisions and work collaboratively to meet strategic goals.

► View Status of Initiatives

► Visualized Goal Achievements Status Against Key Performance Indicators (KPIs)

Track Performance on the Move

With the SAP Strategy Management mobile app, you can extend your on-premise SAP Strategy Management software capabilities to your mobile users.

- Analyse organizational performance at a glance
- Receive alerts and collaborate on key issues that require immediate attention
- Assign individual responsibility for objectives and KPIs
- Align execution with strategy by connecting goals, initiatives, and metrics
- Measure the impact of initiatives to determine how best to allocate resources
- Compare business unit performance side-by-side or with other relevant benchmarks
