

ATA19 Telehealth Interoperability Huddles

Location: Booth #1905

Everyone is invited to join these half-hour-long, informal chats on telehealth interoperability. These brief, focused conversations will take place throughout the conference in booth #1905 on the exhibit floor. The schedule of huddles, hosts and topics can be found below.

Sunday, April 14

NeuroFlow

Sunday, April 14
4:30 p.m. – 5:00 p.m.

A New Frontier for Behavioral Health: How Telemedicine and Data Analytics Drive Outcomes for Patients

One in five Americans have a behavioral health disorder. This widespread need for services is plagued by a lack of access and awareness. Fortunately, advancements in telemedicine and remote patient monitoring are opening doors for more effective treatment. There are also opportunities in effectively leveraging AI and data to bridge the gap between mental and physical health. Learn how NeuroFlow and others are bringing data into the equation to drive better mental health outcomes for patients while generating revenue for providers.

Monday, April 15

innovaTel Telepsychiatry

Monday, April 15
9:00 a.m. – 9:30 a.m.

How Telepsychiatry is the Elegant Solution to the Psychiatric Shortage

With a growing demand for mental health services and a shortage of

psychiatric clinicians, many organizations are struggling to get their patients seen in a timely manner. This session will be led by a tenured telepsychiatrist and they will share how telepsychiatry has proven to be an effective solution with dedicated providers focused on continuity of care in partnership with the rest of your treatment team.

Visit us in booth #811

Pexip

Monday, April 15
9:30 a.m. – 10:00 a.m.

For telehealth initiatives to succeed, interoperability is critical. Healthcare organizations must be able to connect patients and providers using the technologies they already have, in a way that naturally fits into their daily workflows. Pexip will discuss how it enables video interoperability between patients' technologies (i.e. mobile devices and web browsers) and providers' EMRs/EHRs, scheduling systems, existing video systems, and more. Pexip can also discuss how it's powering the Department of Veterans Affairs' VA Video Connect app for hundreds of thousands of users around the country.

Visit us in booth # 601

AMD Global Telemedicine

Monday, April 15
10:30 a.m. – 11:00 a.m.

A key element to telehealth interoperability is to minimize disruption to the current workflow. We want to make it easy for healthcare organizations to seamlessly transition information from telehealth encounters, into their current technology platforms and EMRs. Our philosophy at AMD Global Telemedicine is to maximize the amount of information that is shared in real-time but reduce the buckets of information you have to manage. By design, we do not store any patient health information within our platform, which allows healthcare organization to maintain their current workflow and their PHI remains safely inside the organization.

Visit us in booth # 1927

Carefluence

Monday, April 15
11:00 a.m. – 11:30 a.m.

To truly integrate into the clinical workflows of existing practices, meaningful data exchange between telemedicine platforms and systems of record is essential. What does this kind of integration look like for capturing clinical summaries, demographics, schedules, claims data and more?

Carefluence will review the possibilities of an enriched clinic workflow using a fully integrated approach to telemedicine and the technology behind sending and receiving real-time data for complete and accurate documentation. Join us for a discussion about how to enhance your telemedicine strategy to be an integral part of core clinical practice.

Visit us in booth #2009

HealthCare Appraisers

Monday, April 15

1:30 p.m. – 2:00 p.m.

Will I Ever Get Paid? Medicare Reimbursement Changes and Interoperability Costs

This session will explore the specifics of the new Medicare rules for “virtual care” physician reimbursement and detail the potential for recoupment of interoperability implementation costs. We will also cover key developments in the healthcare compliance landscape and review best practices for telemedicine providers seeking reimbursement from government payors. Healthcare Appraisers performs numerous fair market value opinions on an annual basis involving telemedicine providers cover a wide breadth of services and transactions.

Visit us in booth #2033

A&D Medical

Monday, April 15

2:30 p.m. – 3:00 p.m.

Measurements from medical sensors need to reach the medical professional for making medical decisions. Decisions need to reach not only the patients but also the care giver for better patient care.

There are many kinds of Interoperabilities:

- Among different manufacturers of the same medical devices
- Among different version of the same device (firmware and software)
- Information exchange among EHRs of different patient care facilities

And many challenges to accomplishing Interoperability:

- Device and Data Standards needed for both hardware and software.
- Usability is very difficult at every single step of the End-to-End healthcare process.

Join us for a lively discussion on what can be done to help overcome the challenges and reap the benefits of telehealth interoperability.

Visit us in booth #1503

innovaTel Telepsychiatry

Monday, April 15

3:00 p.m. – 3:30 p.m.

How to Establish a Telepsychiatry Program

Telepsychiatry is not as complicated to implement as you might think. This session will explore the ease with which a telepsychiatry program can be designed and implemented from a team that has over 30 years of behavioral health experience and 10 years of telepsychiatry experience in the community mental health center setting.

Think Biosolution

Monday, April 15

4:00 p.m. – 4:30 p.m.

How can CXOs avoid risk while integrating wearable medical devices in telehealth platforms?

Join us for a discussion on the impact of integrating wearable medical devices in telehealth platforms, and the various regulatory challenges encountered when implementing new software, hardware and analytics to a telehealth platform. Additional regulatory challenges about EMR integration and data security will also be addressed. We will wrap up the discussion by exploring various pathways aimed at mitigating those risks.

Visit us in booth #1913

Tuesday, April 16

SimpleVisit

Tuesday, April 16

11:30 a.m. – 12:00 p.m.

SimpleVisit is a Telemedicine video bridging service that uniquely integrates common platforms like Face Time, Skype, and Google Hangouts with any other platform (polycom, Skype for Business, zoom, VSee, etc.) into a secure and compliant environment.

Join us for a discussion on how our platform plugs into an existing EMR or scheduling system and enables initiation of the visit using the platform preferences of either side. This is of high value for direct-to-patient care but is also used to bridge two different systems between hospitals or clinics.
