TASTE/SCENT

PINE DIESEL-FUEL SOUR

DESCRIPTION

The parents of 3 Chems (Stardawg x ONYCD) contain the three most popular cuts of Chemdog: Chem Dog 91, Chem Dog D and Chem Dog 4 thus the name “3 Chems.” The original source of powerhouse strains like Sour Diesel and OG Kush, Chemdog is known for its distinct, diesel-like aroma. Pungent and sharp, you’ll be able to smell this hybrid from a mile away.

PARENT #1: STARDAWG

Indica-Dominant Hybrid

Breeder: Top Dawg

Lineage: Chem Dog 4 x Tres Dawg

Stardawg, possibly named after the bright, sparkling crystal trichomes that blanket the strain, is a hybrid cross between Chem Dog 4 and Tres Dawg. Pine with sour notes of diesel.

PARENT #2: ORIGINAL NEW YORK CITY DIESEL

Indica-Dominant Hybrid

Breeder: Top Dawg

Lineage: Chem 91 x Tres Dawg

ONYCD is known for the synergy created from the rich terpenes, and high cannabinoid content. The parent strain “Tres Dawg” is a hybrid of Chem D x Double Dawg, rounding out the genetics with some of the most popular cuts of Chemdog.
