## DESCRIPTION

---

Bred by the team over at Mass Genetics, GSOG x MOB is a combination of Mass Genetics' award-winning Grape Stomper OG crossed with a local favorite in the Northeast, M.O.B. This strain is a personal favorite of our head grower, and is the first of his strain selections intended to provide patients with more widespread access to the work of local breeders in the New England cannabis community and showcase the hard work of the gifted breeders that have made the Northeast their home.

The phenotype selected displayed characteristics that take after its Grape Stomper OG parentage, with the tell-tale OG Kush scent dominating the aroma profile. A discerning palette, however, will notice slight fruity hints reminiscent of both the blueberry of the M.O.B. and the sour pine-lemon of the Grape Stomper. Patients who have enjoyed our Chuck OG, Elephant Stomper, or Kushberry may want to try out this new strain.

## PARENT #1: Grape Stomper OG

---

**Hybrid**

**Breeder:** Gage Green

**Lineage:** Grape Stomper x Underdawg OG

Gage Green's original and most popular strain, Grape Stomper, is crossed with the illustrious OG Kush (selected for the finest, heirloom traits from the NY OG Underdawg) to produce a best of both worlds hybrid with strong medicinal properties.

## PARENT #2: Mother of Berries

---

**Indica**

**Breeder:** Disputed - Maine

**Lineage:** Blueberry

Mother of Berries, or M.O.B., is an indica strain from Maine that provides a deeply relaxing experience that transitions well into restful sleep. Carrying the legacy of its Blueberry parent, Mother of Berries lives up to its name with its unmistakable blueberry fragrance.
