ABOUT ME

Sativa-Dominant Hybrid

Breeder: 14er Holistics

TASTE/SCENT

CITRUS GRAPEFRUIT HERBAL SPICY

DESCRIPTION

Bred by the team over at 14er Holistics in Boulder, Colorado and a personal favorite of our Head Grower, Moonrise is a cross between Moonshine Haze, an extremely popular sativa from Rare Dankness and Double Purple Dojo, a version of TGA/Subcool's Double Purple Dojo that 14er Holistics renamed in honor of the significant work put in by a subsequent breeder to further refine the TGA work.

The result of hitting the extremely sativa-dominant mother with pollen from an indica-dominant strain resulted in Moonrise. While the appearance of the plant leans Sativa, some have found the Double Purple Dojo has contributed an increase in bodily effect compared to the overwhelmingly Sativa effects of Moonshine Haze. Patients that have enjoyed our Cannalope Haze, Chocolope, or C99 should definitely consider trying Moonrise.

PARENT #1: Moonshine Haze

Sativa-Dominant Hybrid

Breeder: Rare Dankness

Lineage: Amnesia Haze x Nevil's Wreck

Winner of the 2011 High Times Cannabis Cup for Best Sativa. Rare Dankness created the Moonshine Haze cross by using the wonderful workhorse Nevil's Wreck male to impart extra potency, trichome coverage, and aroma to the Amnesia Haze.

PARENT #2: Double Purple Dojo

Indica-Dominant Hybrid

Breeder: 14er Holistics

Lineage: Sputnik #1 x Black Russian

A version of TGA Subcool's Double Purple Dojo that 14er Holistics renamed in honor of the significant work put in by a subsequent breeder to further refine the TGA work. Most notable is its deep purple coloration, and breeders often turn to Double Purple Dojo genetics when creating new purple varieties.
