DRAWER RELEASE SYSTEMS

Front Drawer Release System (FDR)

Our patented Front Drawer Release (FDR) system is the perfect solution for mobile storage situations, as seen in emergency/rescue vehicles, cargo vans, maintenance trucks, and utility vehicles, where working on level ground is not always possible, subsequently requiring a drawer that can lock in both the open and closed positions. All of our drawer release systems allow for convenient ONE-HANDED operation.

Features:

- **Allows One-Handed Operation** - With the FDR, the drawer can be unlatched and opened from the “latched closed” position; likewise, it can be unlatched & closed from the “latched open” position. A 300# drawer can be pulled open with a single finger!
- **Intuitive to Use** - The design, location, and function make operation easy.
- **Leverage** - The operation of the FDR increases the leverage applied to the triggers to make unlatching easy. Potential binding of the latch triggers is minimized.
- **Flexible** - Works with lock-in/lock-out slides on both sides (for wide drawers) or with a single lock-in/lock-out slide on one side only (and a standard slide on the other side).
- **Professional Appearance** - Our design provides a clean, professional appearance to your access solutions.
- **Customizable and Easy to Install** - Functional, yet simple. Our Front Drawer Release system is the perfect solution for custom sizes and quick, painless installations.

GENESIS™ DRAWER RELEASE SYSTEMS

Drawer Release Pro & Lite

Simple and sleek, these drawer release solutions are more than functional - they are intentional. The Drawer Release Pro & Lite install directly to Austin's 7650 drawer slides using standard zinc plated 1/4-20 bolts.

Both the Pro and Lite systems do not require a pro to properly install. Paired with our 7650 drawer slides, this install is quick and easy. Designed to give the user a convenient one-handed operation similar to our Front Drawer Release (FDR) system. One kit and you're all set. This is the cost-effective functional drawer release option you've been looking for.

Key features include:

- **Allows One-Handed Operation** - A 300# drawer can be pulled open with a single finger!
- **Intuitive to Use** - The design, location, and function make operation easy.
- **Leverage** - The operation of our drawer release systems increase the leverage applied to the triggers to make unlatching easy. Potential binding of the latch triggers is minimized.

Our Genesis™ Drawer Release Pro/Lite is the perfect solutions for mobile storage situations, as seen in emergency/rescue vehicles, cargo vans, maintenance trucks, and utility vehicles when working on level ground is not always possible, subsequently requiring a drawer that can lock in both the open and closed positions. All of our drawer release systems allow for convenient ONE-HANDED operation of the system.

Super Heavy Duty Drawer Slides

We are your one-stop solutions provider for designing, manufacturing, and quality assurance of telescopic linear motion slides. Our super heavy duty series slides provide compact dimensions, rigidity, and high load capacity.

- Super heavy duty applications
- Emergency vehicles and transportation
- Enclosures for data storage and communication
- Machinery and tool storage

1100 lbs Loading ADS 1100

770 lbs Loading ADS 770

We also carry a broad line of standard steel slides, available with various lengths, travels, features, functionality, and more. With an accumulated mechanical engineering knowledge base that relates to industrial grade steel slides, custom manufacturing capabilities, and a global footprint, Austin Hardware® is your ideal source for all of your drawer slide requirements.

POWERMASTER COMPARTMENT LOCKING SYSTEM

PowerMaster Locking System

A high-quality locking system can make a non-violent thief turn around and walk away, sending them looking for an easier target. At Austin Hardware®, “We Know Trucks” and we know how important it is for you and your customers to conveniently keep tools and supplies locked up and secured. Protecting you and your peace of mind.

Locking Features:

- All compartments can be locked with a push of one button on a key fob
- Padlocks on both sides of the truck body are no longer required
- Special latches/handles **NOT** required
- Quick Installation
- Fewer points of failure
 - 2 Linear actuators - compared to one solenoid per latch
- Retrofits to most “Gang-Lock” systems.
- Unbeatable price
