“What’s in a name?”

**Will Thalheimer**

@WillWorkLearn

Following

Marty Rosenheck: he's no longer an instructional designer. He's a learning experience designer. [#olc14](#) [@mbr1online](#)

10:01 AM - 23 Sep 2014

# Jobs with this in the title...

- Instructional Design
- Learning Experience Design

Informal search on LinkedIn (only my 1<sup>st</sup>, 2<sup>nd</sup>, & 3<sup>rd</sup> level connections)

“Learning is something people do.  
Training {instruction} is something you  
do to people.

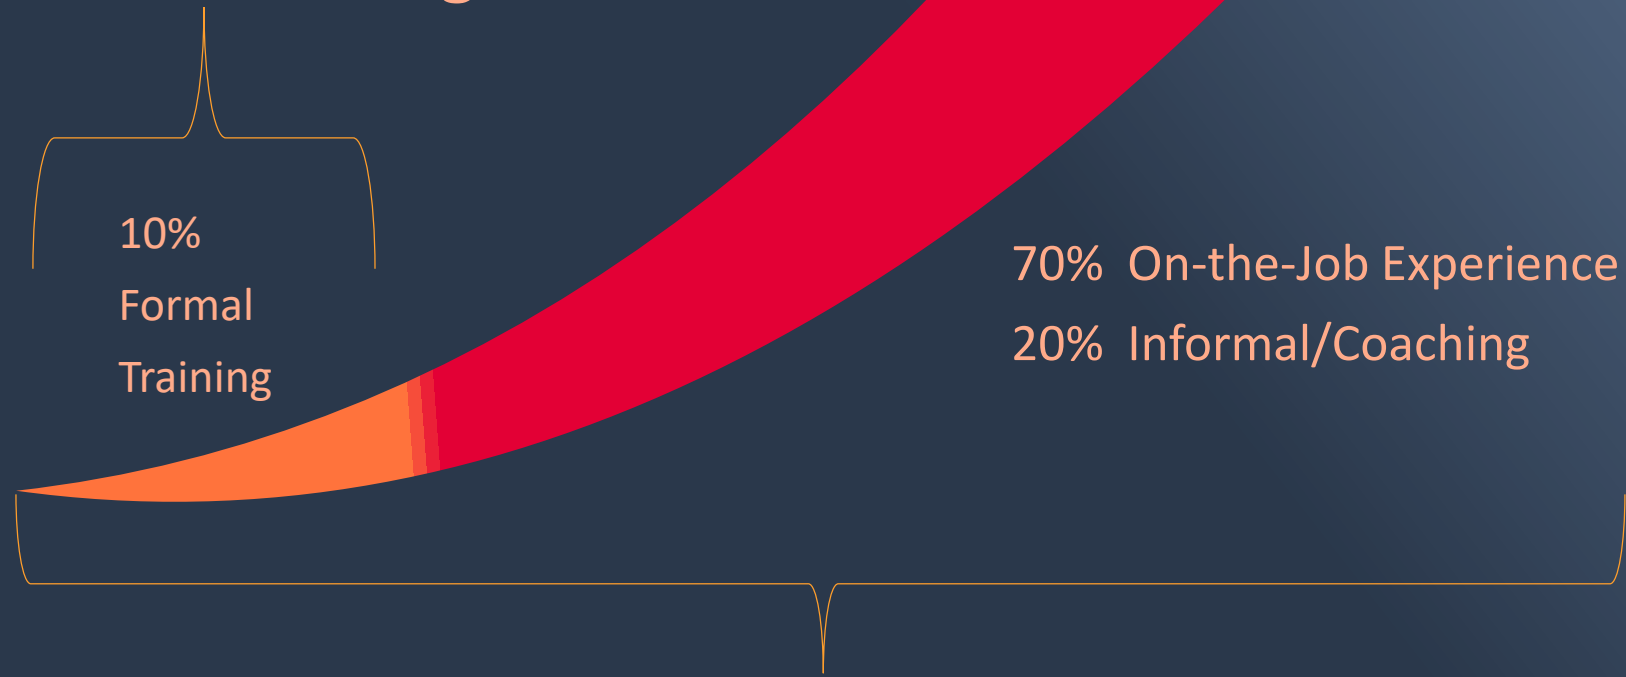

- Jay Cross

“Your learning challenge?”

Takeaway:  
Instruction is only a small  
part of learning.  
@mbr1online

# Proficiency

## Instructional Design

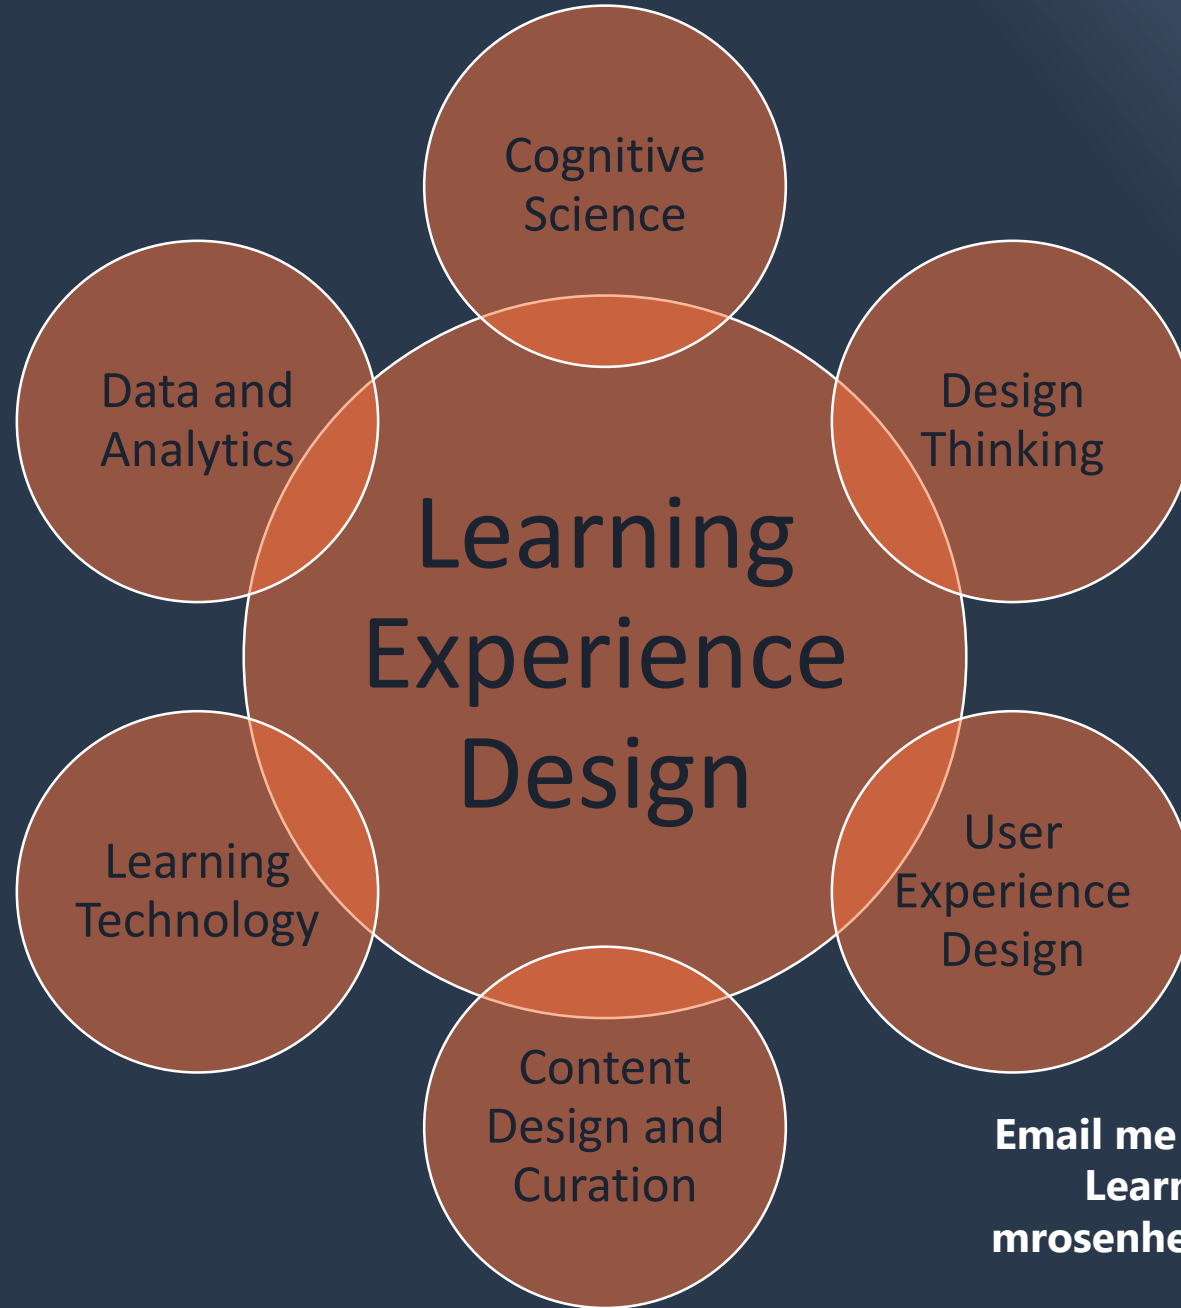

## Learning Experience Design

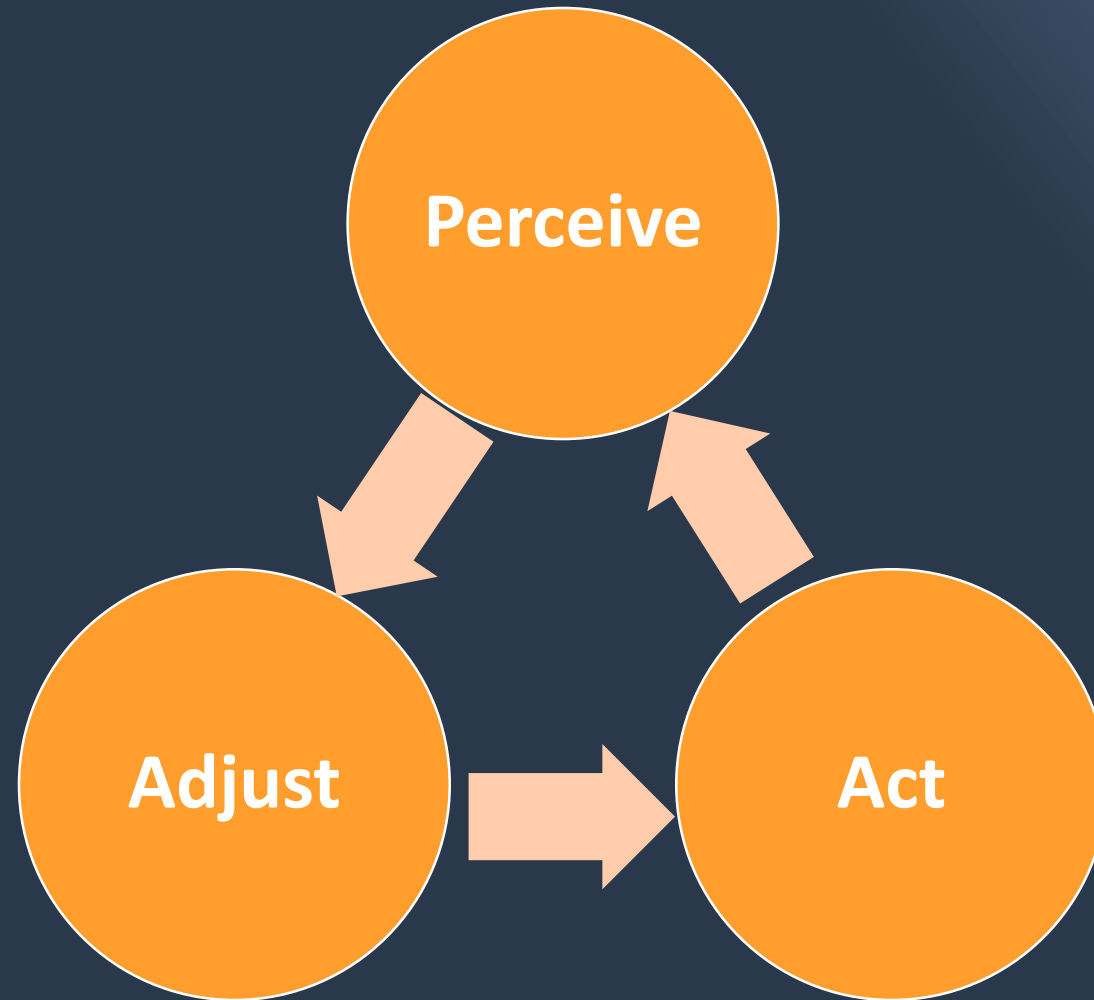

# Learning Experience Design

The **learner centered** process of facilitating the learning and application of knowledge and skills (expertise, proficiency) by providing a set of learning activities (formal, informal, and **experiential**) supported by content, feedback, and technology.

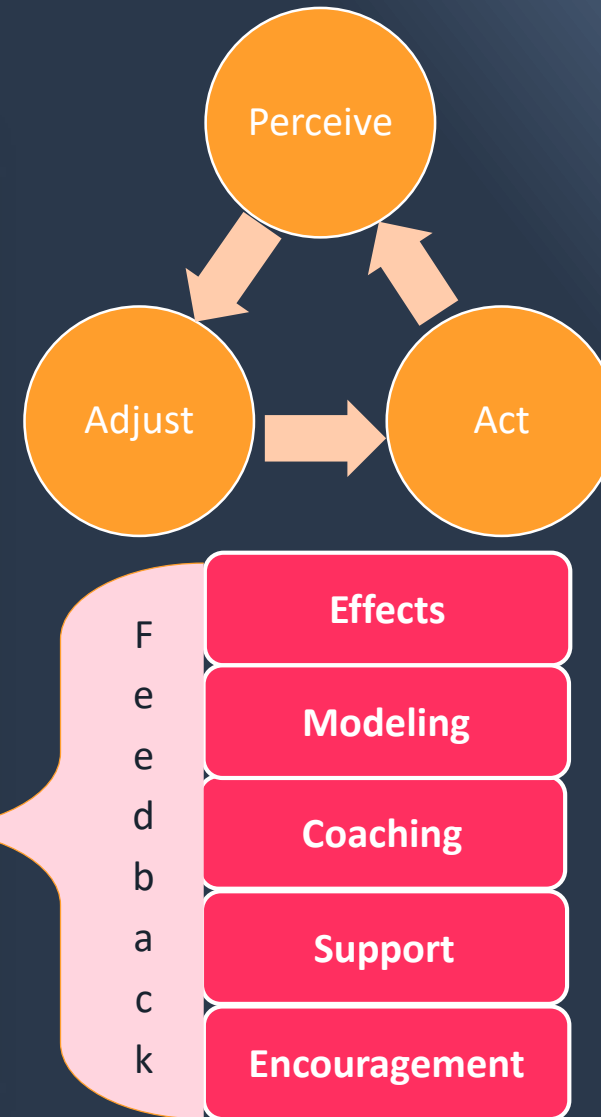

# LX Design Parent Disciplines

# Creating a Guided Path to Proficiency

# Design Thinking

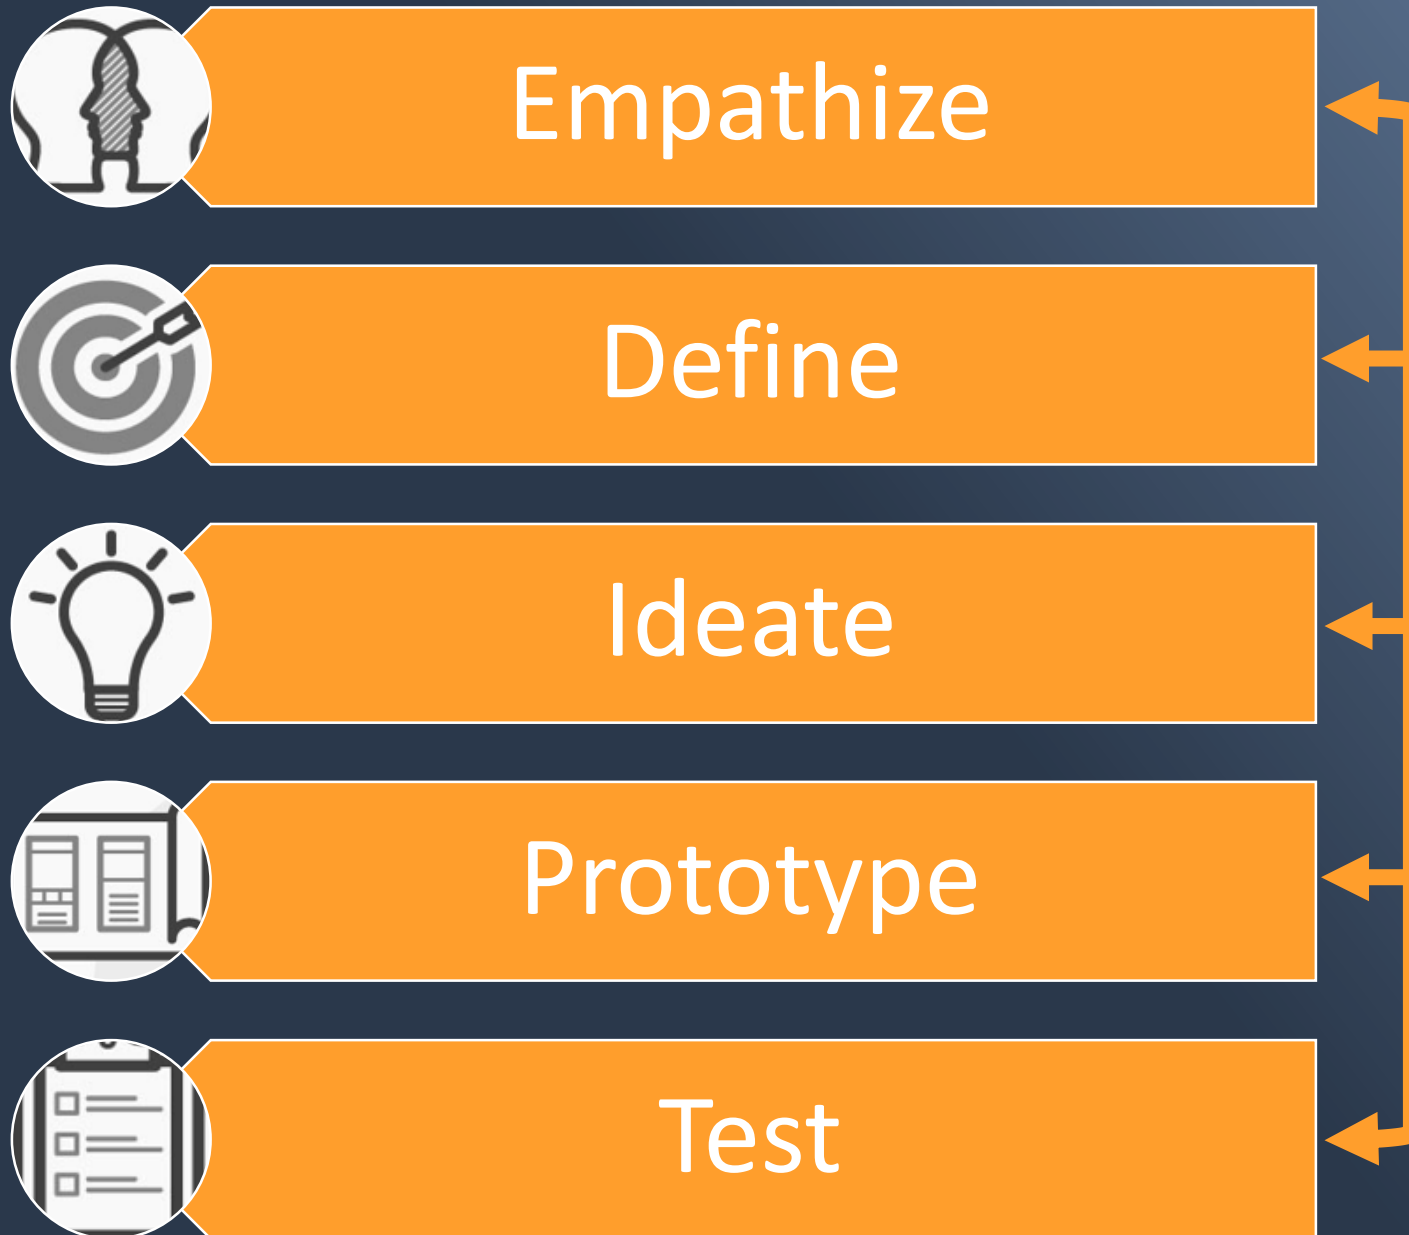

*A formal method for practical, creative resolution of problems and creation of solutions*

Design Thinking is meant to be a

- 1. Divergent** exploration process that leads to
- 2. Convergence** around a solution.

- Mike Hruska

# Design Thinking

# User Experience Design

## UX

*“The process of enhancing user satisfaction by improving the usability, accessibility, and pleasure provided in the interaction between the user and the product.”*

- Wikipedia

### **Goal:**

Make products and software  
**Useful, Usable and Delightful**

### **Process:**

- User Research
- Design
- Testing
- Implementation

*Aretha Franklin*

# Define: Learner Persona

**Empathize!**

# Input:

## Situations

- List all of the situations they handle

## Categorize

- Organize those situations into categories

## Variations

- Identify how they vary on various parameters

## Taxonomy

- Create a “Taxonomy of Situations” to guide creation of learning experiences.

## Knowledge

- Identify the knowledge (content), strategies, heuristics, and process that experts use to handle the situations

# EXPERIENCE

# CONTENT

Takeaway:

If content is  
king,  
experience is  
the  
emperor!

@mbr1online

# Content

- On-demand content
  - Knowledge Base
  - Video or Audio clips
  - Social
  - Checklists, Guidelines
  - Mini-Tutorial
  - Ask Someone!
- Performance Support

Takeaway:

Provide  
content and  
feedback  
at the  
**Teachable  
Moment.**

@mbr1online

Takeaway:

Begin with scenarios, challenges and provide content at the teachable moment.

  - [-] Redetermination of Eligibility

### FLA Codes: Overview

The FLA codes indicate which of the following applies:

- The individual's or couples FBR, or
- The \$30 individual (\$60 couple) benefit rate.

The codes also indicate whether ISM is valued at the VTR or PMV.

There are four FLA codes, A, B, C, and D.

# On-the-Job Learning

The screenshot shows a mobile application interface for a learning experience. At the top, there is a browser-like header with navigation arrows, a search bar containing 'learning-expe', and icons for a star and a document with the number '2'. Below this is a secondary navigation bar with a 'BACK' button, a search icon, and a 'MENU' button. The main content area features a task title 'LA-R3-Perform a Water Test' followed by a descriptive paragraph: 'Learn how to perform a water test using a local water supply to determine if it contains contaminants and record your results.' Below the description is an 'Instructions' section with the text: 'Use the Knowledge Base to learn about water test methods, collecting water samples and recording test results. Select a test to conduct on a local water sample.' At the bottom, there is a list of two sub-tasks, each with an icon and a right-pointing arrow: 'S-R3-1-Research Test Methods' (with a red book icon) and 'S-R3-2-Conduct a Water Test' (with a blue pencil icon).

## CONDUCTING WATER TESTS

Water tests can be conducted both in the field and in a laboratory setting however there are some contaminants that must be tested in the field and others that must be tested in a lab.

- Tests should be conducted in the field when the symptom or contaminant may dissipate before a water sample can reach a lab for testing. For example, if water has an odor, it would be important to test it quickly before the odor goes away.
- Many field tests are not sensitive enough to provide sufficient quantitative information on contaminants covered by the USEPA Primary Standards. Regulations for public water systems also require that these contaminants are analyzed by state or federally-certified laboratories for such testing.

# Your Takeaways

A woman with long dark hair is singing passionately into a vintage-style microphone. She is wearing a dark, textured jacket over a white top. In the background, a guitar is visible, and there are some faint, artistic splatters or light effects around her.

- What is one thing that you might do differently when you get back?
- What would you like to delve into further?

# Thank you!
