

SOFTWARE DEVELOPER

LEVEL 4
18 MONTHS
FUNDING BAND 12
£18,000

Provider of professional qualifications:

Microsoft
Technology Associate

On this Software Developer Level 4 apprenticeship programme, learners will learn a whole range of software skills that will generate careers which will span from junior roles in web, app and games development with progression opportunities to senior roles with experience. During this apprenticeship, learners will gain a Diploma in Software Development Methodologies from the British Computer Society and a Microsoft certification in HTML5 Application Development.

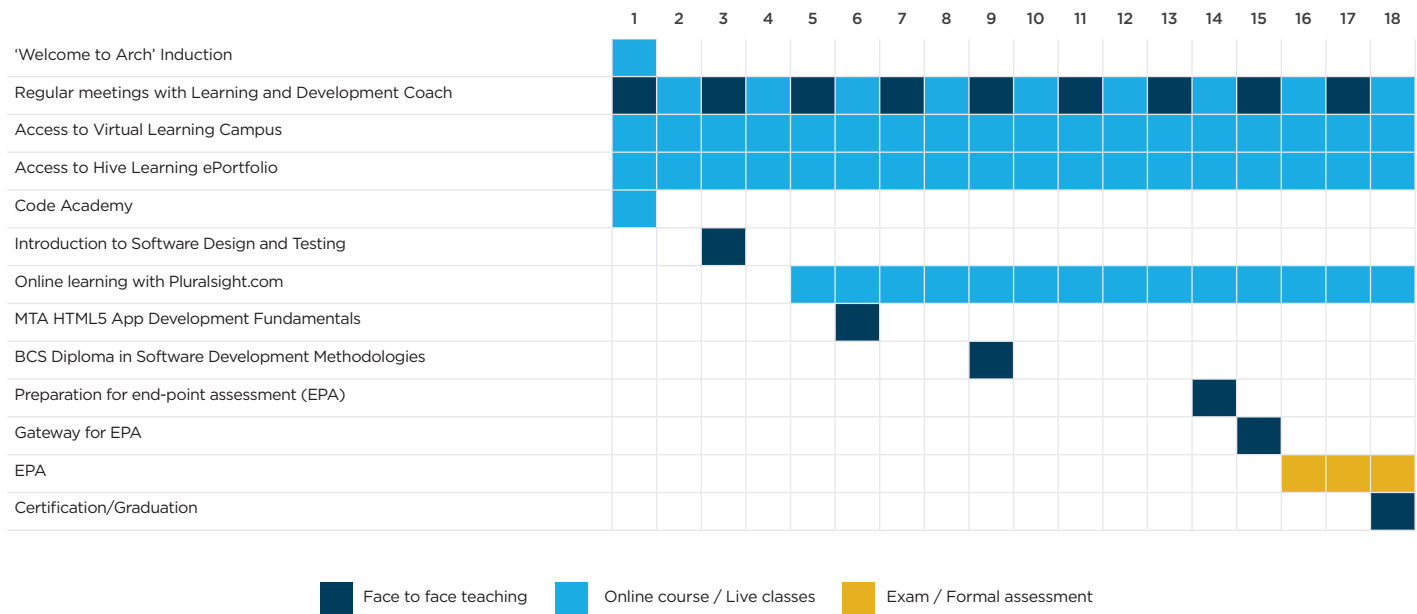

EMPLOYERS THAT WE WORK WITH:

Civil Service Learning

YOUR LEARNING JOURNEY

ABOUT ARCH APPRENTICES

- Arch was first developed by the Blenheim Chalcot group to supply digital talent to their fast-growing start-ups. The programme soon grew and began providing apprentices to external clients - one of the first being Google.
- We have led on the creation and delivery of a number of apprenticeship programmes including the first digital marketing apprenticeship.
- In 2016, Ofsted rated us 'Outstanding' in every area making us one of the top 5.6% of all independent learning providers.
- We're one of the fastest growing providers in the UK and recently won the exclusive rights to deliver finance and HR apprenticeships across Civil Service Learning, and also chosen as approved providers across the public sector for a selection of apprenticeships.

WHAT'S INCLUDED IN THE APPRENTICESHIP?

20% of the apprenticeship must be done away from the apprentices' work to count towards their off-the-job training - this can be a mix of face to face and virtual classrooms, projects, distance learning and meetings with their dedicated Learning and Development Coach.

Qualifications included:

- MTA HTML5 Application Development Fundamentals
- BCS L4 Diploma in Software Development Methodologies
- Software Developer Level 4 Apprenticeship

PRE ENTRY REQUIREMENTS

- Must already have English and Maths GCSEs at Grade C (4) or above and preferably a total of five GCSEs.

THE PERSON YOU'LL HAVE AT THE END OF THE APPRENTICESHIP WILL:

- ✓ Writes good quality code with sound syntax in at least one language.
- ✓ Can effectively link code to the database/data sets.
- ✓ Can understand and create basic analysis artefacts, such as user cases and/or user stories.
- ✓ Can operate at all stages of the software development lifecycle.
- ✓ Can respond to the business environment and business issues related to software development.
- ✓ Can apply the maths required to be a software developer (e.g. algorithms, logic and data structures).
