# Change Lives
Help People Find Fullfilling Careers
Save Time and Money

TeleCommunication Systems, Inc, a wholly owned subsidiary of Comtech Telecommunications Corp (hereinafter Comtech) designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. Comtech's Mission-Critical Technologies Group is a premier cybersecurity training organization supporting the U.S. Department of Defense (DoD) and the U.S. Intelligence Community, offering training solutions certified by the American Council on Education.

We partner with World of Work Inventory (WOWI) to provide career assessments. The career assessments measure 35 characteristics in the areas of learning potentials, job satisfaction, and career interest.

Career Interest Activities

Professional, Managerial & Technical	
Public Service	14
The Sciences	14

world of work inventory

Comtech's CYBRScore solution provides premium, performance-based cyber skills training, cyber labs and cybersecurity assessments quantifying a user's knowledge, skill and ability in response to real world cybersecurity scenarios. Leveraging the NICE framework, CYBRScore creates the complete end-to-end experience, delivering targeted, outcome-oriented cyber security training experiences. We use the WOWI career assessment web-based tools to identify those candidates with the aptitude, interest, and job satisfaction indicators (psychological composition) that predict the candidate is likely to complete the training and succeed in the information technology or cybersecurity career field.

WOWI is a scientifically developed, objective assessment that incorporates three dimensions to uncover the optimal career matches. It measures up to 35 different factors to create actionable career recommendations.

About CYBRScore®

Comtech Mission-Critical Technologies (Comtech MCT) provides cybersecurity solutions and services tailored to training and workforce development. The CYBRScore® product portfolio was created by a team of former National Intelligence Community members who all possess the necessary hands-on, practical cybersecurity experience and abilities required to meet the needs of our demanding customer base. Our experts share the intellectual curiosity to constantly ask the 'why' and 'how' as they develop and deliver truly unique products and services to help close the growing cybersecurity skills gap. The Comtech MCT CYBRScore® offerings include off-the-shelf and custom training, hands-on skills labs, and competency-based assessments mapped to cybersecurity job roles.
