

# Proteus® Plus 2.5"

## Proteus® Plus | 2.5"

The Proteus Plus Solid State Drives extend write performance over the established Proteus series. With 20% faster sustained writes and random writes of 4K blocks running almost 3x faster, these SSDs can better support intense system applications that require higher levels of performance.

Proteus Plus delivers ultra-high-reliability mass storage in an industry-standard package. They fit the standard 2.5 inch drive dimensions, allowing direct replacement of rotating disk drives. Secure erase functionality features seven different agency approved enhanced erase methods. Erasure can be initiated by either software command or an internal jumper.

Proteus Plus support the SATA, revision 2.6, interface standard at up to 3.0Gb/s. With a high speed controller and 64MB of on-board cache, the Proteus Plus SSD delivers sustained reads up to 250MB/s and sustained writes up to 205MB/s. A robust interface is ensured by integrated hardware support for on-the-fly, per sector error detection and correction. The resulting bit error rate is less than one in 10<sup>14</sup>.

Rigorously tested and independently verified to MIL-STD-810, the ultra-rugged Proteus Plus will survive the harshest environments. The drives have a conservatively calculated MTBF of over 1.24 million hours. Industrial grade SLC NAND technology provides data retention of over 10 years and write endurance of over 100,000 writes.

Designed and manufactured in the USA at ISO9001-certified facilities, Comtech MCT's SSDs are the unquestioned reliability leaders among high-performance, rugged SSDs.
