

Looking to grow and streamline the management of your practice? Make it simple. One platform to reach clients and manage your practice.

One for All.

Built by attorneys for attorneys

We've been where you are. With that experience in mind, we developed one platform for all of your case and practice management needs. Our continual improvement model takes your feedback to continue to enhance the platform, too.

Focus on the case, not the paperwork

From tracking invoices to managing communications with clients, one interface fills all your case and practice management needs. Need some short-term paralegal support? With our resources, you can hire a vetted paralegal to assist you on demand.

Help clients find you

With SimpleLaw, clients search for attorneys in one easy step. They can simply post a question or initial case information to the SimpleLaw website and all attorneys with active approved profiles can respond. There is no fee to have a profile on SimpleLaw.

Put an end to integration issues

Your documents remain your documents and are never stored in SimpleLaw. Working with Dropbox, all approved individuals can view, add, and remove documents from the case file. When you are done with the case, simply store them as you wish.
