Vertical Bottom Loading

Case Packer (Everest) offers a conventional alternative to a pick-and-place system.

Loading your case from the bottom means never letting go of your product. The Schneider Bottom Loading Case Packer (Everest) handles your product gently and is a conventional alternative to a "pick-and-place" system.

- Unique bottom loading design
- Product handling is gentle on your product
- Your product is always fully supported
- There is no pick-tooling required
- Nothing touches the top of your product

VERTICAL BOTTOM LOADING CASE PACKER

SPECIFICATIONS

Case Types	Regular slotted cases (RSC) or display cases (HSC)
Controller	Rockwell Automation PLC
Power Requirements	480 Volt, 3 Phase
Case Magazine	Standard: 40" usable magazine Optional: 24" incremental extensions up to 120" maximum
Sealing	Low temperature hot melt glue or tape
Construction	Standard: Painted, carbon steel Optional: Stainless steel for wash-down applications
Visual Display	Rockwell Automation color touchscreen HMI
Enclosures and Electrics	Standard: NEMA 12, Optional: NEMA 4, 4X
Safety	Meets ANSI/PMMI B155.1 and ANSI/RIA 15.06 safety standards

INTELLIGENT ILLUMINATION

Integration Options:

- Checkweighing
- X-ray/metal detection
- Bar code readers
- Vision fulfillment verification system
- Labeling/coding/marking equipment

Intelligent Illumination™ (Standard on this machine)

Intelligent Illumination™ proactively cues operators where attention is needed with tasked-based lighting, allowing them clear visibility to issues without consulting the HMI.

ProAdjust®

ProAdjust® is an automatic change over system for various products and case sizes. This system is modular and features an easy-to-use hand-held interface driving power modules which make the machine adjustments.
