

MAY 2019

Welcome to the Rally Software® (formerly Agile Central) newsletter. Get the latest product updates, announcements and resources each month.

## 'Rally Software' Once Again!

You may have seen changes to our product name over the last few months. We are excited to officially announce that we are returning back to our original product name, Rally Software®. While you may still see reference of our old product name, "CA Agile Central" over the web, in assets, and in the product UI, please be aware that we will be updating these references from now throughout the end of the calendar year.

## Proud Title Sponsor of Agile2019

We are excited and proud to share that Rally Software® (formerly CA Agile Central) is once again a Title Sponsor at Agile2019, which will take place August 5-9 in Washington, D.C.

This will be the 18th annual Agile conference organized by Agile Alliance in North America, bringing together an international community of Agilists who are dedicated to making the software industry more productive, humane, and sustainable.

Visit our booth and connect with our friendly team to learn how Rally is simple for teams, yet powerful enough for the enterprise, through our all-in-one agile planning capabilities. We'll be available that entire week to offer product demos, or you can spend some dedicated time with our in-house agile experts in our booth's Agility Lounge.

## Product Updates

- Improve your screen real estate and create focused views on your Team Board by using NEW **collapsing columns**.
- Update to Capacity Planning: Create your portfolio item backlog faster and more efficiently by leveraging filters and **selecting columns that matter** to you.
- You can now **block portfolio items**. This capability enables you to display portfolio items as "blocked" while keeping the associated work "unblocked".
