## IBM Think 2020, May 4-7

Attending IBM Think? We are too! Broadcom is proud to be a Platinum Sponsor of the event and will be offering a wide array of expert-led sessions on all of your mainframe interests. We're excited to show you how we are helping make the

mainframe easier to use and more innovative than ever. Join the conversation and plan to meet up with us in San Francisco by [registering here](#).

THIS MONTH'S FEATURED ITEMS

## The Industry's First Enterprise-Grade Support for Eclipse Che4z and VS Code4z

Eclipse Che 7 is an IDE to collaboratively build container-based applications used in developing today's most innovative applications. Broadcom recently donated mainframe extensions to Che, Eclipse Che4z and VS Code4z, and we just

launched the industry's first enterprise-grade support for them. We're making it easier to leverage the tools you want in order to drive your digital transformation efforts across platforms. Read more about this [here](#).

EVENTS AND HAPPENINGS

## Join Broadcom at SHARE Fort Worth, February 23 - 28, 2020

Broadcom is excited to be a SHARE Strategic Partner! Make plans to join us at SHARE Fort Worth 2020 along with hundreds of your mainframe peers and colleagues.

Visit us at booth #401 and check out our latest innovations around open-source DevOps, AIOps, automation, data-privacy and compliance.

Learn more about Broadcom at SHARE Fort Worth [here](#).

Mark your calendars now for the opportunity to learn, have some lunch and win prizes:

Monday, Feb 24th, 12:25 PM	<b>Fueling Innovation through Connectivity and Openness</b> Greg Lotko - SVP and General Manager
Tuesday, Feb 25th, 12:25 PM	<b>AIOps: Conquer the Chaos and Unleash the Power of Hybrid IT</b> Nicole Fagen - Director, Product Management, AIOps and Automation
Tuesday, Feb 25th, 1:45 PM	<b>Best Practices Roundtable: Embracing Open Source</b> Hayden Lindsey - VP, Mainframe Architecture & Engineering, Gustavo de Paiva Almeida - IBM Global Services, Infrastructure Services Delivery, Sujay Solomon - Chief Z DevOps Advocate
Wednesday, Feb 26th, 12:25 PM	<b>Embrace Open Trivia Competition and Lunch</b> Greg Lotko - SVP and General Manager

## Registration is Open for the 2020 Mainframe Technical Exchanges

Join us for our **Mainframe Technical Exchanges** in 2020. These free educational events provide you with access to the outstanding teams behind your favorite CA products, as well as the opportunity to discuss your business challenges with technical experts and your industry peers. [Click here](#) to learn more and register.

- Mainframe Technical Exchange Pittsburgh, PA - Mar. 31 - Apr. 2, 2020
- Mainframe Technical Exchange Prague, Czech Republic - May 12 - 14, 2020
- Mainframe Technical Exchange Lisle, IL - Aug. 25 - 27, 2020
- Mainframe Technical Exchange Plano, TX - Oct. 13 - 15, 2020

Registration is Open for the CADRE/CA Datacom® and IUA/CA IDMS™ Technical Conference, Apr. 20 - 24, 2020 in Addison, TX

Please join CADRE, IUA, and Broadcom for a joint CA Databases conference on April 20-24, 2020. We will bring together both CA Datacom and CA IDMS customers along with the Broadcom Product Teams under one roof for an exciting week of learning and networking. [Click here](#) to learn more and register.

EVENTS AND HAPPENINGS

### 2020 Edinburgh Mainframe Summit

Are you ready to take your mainframe to the next level? Join us in Edinburgh on the 26th of February and explore how the modern mainframe is becoming increasingly integral to our hybrid IT world—and how you can leverage this to drive growth in your organization. [Register today!](#)

### CMG Impact 2020, February 9-12, Las Vegas

Join us at CMG—The Digital Transformation Association—a highly influential worldwide organization of IT professionals committed to digital transformation initiatives and best practices, including IoT, Artificial Intelligence and Machine Learning, Digital Process, Cloud Native Applications, and the IT infrastructure that supports them. Broadcom is a proud Platinum Sponsor.

**Don't miss** — Self-Healing Trifecta — Earlier Warning, Faster RCA, Automated Resolution, presented by Jyotsna Chatradhi, AIOps Engineering Team Lead, Broadcom — February 12th at 10:30 AM.

Each month, we feature a Broadcom mainframer who has contributed greatly to our division to get to know them a bit better. This month, we're meeting Mainframe Security Specialist Carla Flores.

**Q. How long have you been with CA/Broadcom and what are the big roles you've held in your career?**

I've been with CA/Broadcom for just over 16 years. I started on the pre-sales team, then moved to product management and product marketing. My passion is helping customers solve problems, so I moved back to pre-sales to more closely help our customers. I grew up in the data center at a large Blues plan, and worked my way up through the ranks from operator, systems engineer, and security analyst. I was also recruited by a specialized security company and spent several years in a consulting role before joining CA/Broadcom as a subject matter expert in mainframe security.

**Q. How else are you involved in the mainframe community? Why do you find it important to be involved in the greater community?**

I currently hold a Board position at SHARE. For those that don't know what SHARE is all about, check it out at [SHARE.org](#)! Broadcom is a new strategic partner with SHARE and we are helping the mainframe ecosystem grow with more education and networking opportunities. I also participate in many other mainframe and security conferences, not only as a speaker, but helping build meaningful education opportunities. I like to think you are never too skilled to learn something new, and being involved outside of Broadcom affords me the opportunity to learn and network every day!

**Q. Any fun facts or words of wisdom?**

I have a passion for racing cars and rock climbing. Many don't know that I volunteer a lot outside of work; from Scouts, to my son's gymnastics team, Church, and helping kids learn to code. Yes, it makes life a bit hectic at times, but using both life and work skills to help someone learn and grow is very rewarding. Everyone says they are too busy, but you can always find time to do something you are passionate about.

EDUCATE AND ENGAGE

## CA Mainframe Education is offering our Product Web-based Training at no cost for *active maintenance* customers.

Below is a list of resources to assist you as a first-time user of Learning@Broadcom. You will also find the link to our Mainframe Course Catalog.

- [Two-Minute YouTube Video](#)—This video will show you how to access and navigate Learning@Broadcom
- [FAQ Support Registration](#)—Frequently asked questions about accessing customer support and education.
- [Course Catalog](#)—List of available Mainframe Product Web-based Trainings (WBTs) and Instructor-led Trainings (ILTs).

**Note:** Broadcom Employees access the Learning Management System by clicking on the [Learning@Broadcom](#) tile on your *Okta* log-in.

The following are new courses now available for consumption.

Course Title	Course Code
CA Brightside Support Offering 100	06BRS10010
CA 1 Tape Management: Tape Processing	06TPM20110
CA 1 Tape Management: Tape Processing with CA 1	06TPM20120
CA 1 Tape Management: Initialization and Operation	06TPM20130
CA Mainframe Resource Intelligence Overview 100	06MRI10010

### ASE Program

Our intensive new hire mainframe training is being hosted in two locations this quarter and will wrap up in March. This workshop covers soft skills needed for team collaboration and technical foundational mainframe skills so that each person is able to begin working with their teams immediately after the program. Our location include:

- North America, Frisco, Texas from January 28th to March 13th
- Prague, Czech Republic from February 4th to March 27th

Check out industry influencer Dez Blanchfield interviewing Broadcom mainframers who recently graduated from the ASE program—and [discover what this program is all about](#) directly from the people who have gone through it themselves.

To learn more, please contact Jennifer Scott at [jennifer.scott@broadcom.com](mailto:jennifer.scott@broadcom.com).

DEVOPS AND APP DEV

### Upcoming Mainframe Product Roadmaps

We've got three great roadmap sessions coming up in February to keep you up-to-date on the latest features and enhancements of our products. Check out the complete list and [register here](#).

Can't make a session? No problem. [Visit our replay page](#) with your login details to make sure you never miss a roadmap session.

### The Re:Frame Podcast—Mainframe DevOps

In this episode, we talk about Mainframe DevOps, and the vibrant community that supports it. Mainframe developers have a wealth of new tools and techniques available to them, and it's good to know there are veterans and innovators willing to share their experience. We talk about DevOps, Endeavor, and the people that know it best, with the president of the Endeavor Users of New England, Phil Gineo.

### Zowe User Community Virtual Meetup

Don't miss this opportunity to network with other Zowe users, learn about others' experiences, and get your questions answered by experts. See the open source model in practice. Join us on February 13th at 11am EST and click here to [register](#).

### CA Endeavor: Using Visual Studio Code and Git for mainframe appdev

Broadcom's Vaughn Marshall and GitHub's Phil Holleran [presented a webinar](#) on this topic hosted by DevOps.com's Mitch Ashley. The presentation illustrates how, using the CA Endeavor Bridge for Git, team members can use the Visual Studio Code IDE with Git version control and the Zowe CLI with no disruption to colleagues working on the same code using ISPF and/or Eclipse. The session includes a comprehensive demo of the tools working in concert to provide developers and systems programmers a powerful platform for DevOps automation.

### Continuous Integration for a Mainframe App? Have You Lost Your Marbles?

Broadcom's Mike Bauer describes how he [constructed a CI pipeline](#) for a sample mainframe application using modern open-source tooling including Jenkins and the Zowe CLI.

## Please join us for 'AIOps: Conquer the Chaos with Intelligence in Context'

This is a webinar hosted by IBM System Magazine, Tuesday, March 24, 1:00 ET. Nicole Fagen, Director of Product Management for AIOps and Automation at Broadcom, will be leading an exploration of a pragmatic approach to adopting AIOps. Learn how you can:

- Proactively address issues before they impact your business
- Spend less time fighting fires and false alarms
- Automate wherever possible to simplify your day-to-day

[Register Here](#)

### SECURITY

## It's Never Been a Better Time to Be in Mainframe Security

Here at Broadcom, we believe it's never been a better time to be on the mainframe. And the mainframers who work on the solutions that serve your business every day want to tell you why. [Listen to Dave Klopf](#), a senior software engineer within our Mainframe Security portfolio, explain how developing security software has evolved in recent years and why he thinks modern mainframe development techniques matter.

### DATABASE

## Elevating Mainframe PII Data Security CA Test Data Manager + CA RC/Extract Integration Now Available

Digital transformation is driving the need to expand or extend data extraction to all your systems, requiring increased hyper-diligence in safeguarding PII data even from the Mainframe.

Join Broadcom Inc. for an in-depth technical discussion, live demo, and Q&A to learn how you can elevate the security and protection of your mainframe Db2 data being extracted **\*\*TO TEST ENVIRONMENTS\*\*** through intelligent masking. [Sign up for the Webinar](#)

If you can't make it, sign up anyway and we'll send you a link to the webcast replay. You'll Learn:

- What is RC/Extract for DB2 for z/OS?
- How can I use this solution to safely extract data from my mainframe?
- What are the pros and cons of data masking?
- Plus much more!

### CORE PRODUCTS

## CA Gen—Focus on the Business

CA Gen offers platform-independent modeling to help developers focus on the business rather than the technology. Developers make changes to the model, not to the code, to improve time to market and add agility to software delivery. CA Gen offers flexibility to build locally or remotely, generates code in a variety of languages, and deploys to multiple platform environments, including z/OS, Windows, Java, .NET, Linux, and UNIX. Coding and debugging is done for all platforms using the same language thus requiring only a single skill set to code for multiple target environments.

Stay informed on all things CA Gen by joining the [CA Gen EDGE Community](#). Catch up on Gen's growth and roadmap plans by listening to these webinar recordings:

- ["What's Happening with CA Gen"](#)
- [CA Gen Product Roadmap](#)
