KNAUF

In our operations

- Be efficient with our use of energy and use natural resources responsibly, including conservation of water.
- Recycle or reuse materials wherever possible, prevent pollution and continue to reduce waste and emissions targeting zero waste to landfill.
- Establish and review measurable objectives and targets in accordance with our environmental management system.
- Actively monitor, analyse and audit our environmental performance including benchmarking and the adoption of best practices.
- Engage with our supply chain to improve overall sustainability performance.

With our people

- Empower our employees to deliver sustainable outcomes, meet their obligations towards environmentally conscious individual and company practices, as well as community expectations and standards.
- Provide training for our employees to support continual improvement and achieving our sustainability goals.

With our solutions

- Ensure the design of our efficient products, systems and services takes into account their impact on the environment and society over their lifecycle.
- Work collaboratively with our customers from design and specification through to project delivery, end of life and recovery.

SUSTAINABILITY POLICY

Everything we do, every decision we take, we have the well-being of society and our environment in mind.

Reducing our impact on the environment is an essential company value and a key component of the way we do business. We communicate and listen to our stakeholders' feedback, and our compliance with applicable legislation is a foundation of our commitment. Knauf recognises that sustainability is critical to the long term success of our organisation and is committed to continual improvement.

Gavin Burton
Managing Director
June 2018

Knauf is a major manufacturer and supplier of high quality sustainable building materials to the light weight construction industry in Australia, including plasterboard, compounds, cornice, acoustic design solutions, metal and associated products and systems.
