

INTERAXO

A SMART
TOOL FOR
COLLECTING
FDU DATA

The Planning and Building Act requires the responsible applicant to produce and submit the necessary documentation for a certificate of completion.

Late procurement of the necessary documentation can result in unnecessary supplementary work, reminders and insufficient documentation being submitted.

The tool for collecting FDU data in Interaxo provides access to a template that easily shows subcontractors and staff what documentation is required, thereby streamlining the process for builders.

A consistent construction project plan shall include collection and delivery of FDU data. The FDU delivery shall be updated concurrently with the project to allow for the management of risks such as delays, bankruptcies and other commonly used procedures

- Oslo Municipality

GET STARTED TODAY AND SAVE TIME AND MONEY!

The set-up cost of up to SEK 29,000 includes up to 14 hours of customisation and support from one of our knowledgeable advisors. For more experienced administrators and small projects, we have a more basic option for SEK 19,000 that includes up to 7 hours of support.

WHAT ARE THE ADVANTAGES OF COLLECTING FDU DATA?

- Access to a template for collecting FDU data
 - Ready set of metadata
 - Defined process that can be adapted
- * API that automates the process

WHY CHOOSE INTERAXO FROM TRIBIA?

With more than 100 000 users, we are a leading supplier on the market of project tools for IT, as well as for the building and construction industry in the Nordic countries.

Interaxo makes the job so much easier, as all the information is available in one location. That saves us a lot of time. The folder structure simplifies the workflow further with version history, verification and allocation of responsibilities.”

- Erling Jensen
