# **INTERAXO**

THE KEY TO SUCCESS IN YOUR PROJECTS

## DO YOU WORK WITH BUILDING AND CONSTRUCTION PROJECTS?

Then you will undoubtedly know that cooperation and coordination of actors, roles, documents, drawings and deadlines is a demanding job and that errors can have major consequences.

Interaxo is a collaborative solution that facilitates decision-making and ensures that projects progress as planned. The solution will be adapted to your projects and give you full control.

#### COOPERATION

Interaxo is a cloud-based project portal to which you can invite both internal and external project participants. It gives everyone a complete overview of his/her area of responsibility, making it easy to discuss and solve problems as they arise.

#### MANAGING DRAWINGS

Interaxo has a secure and efficient feature for managing drawings that ensures that all project participants have access to approved and up-to-date drawings. As it is possible to mass import drawing lists and drawings, you can quickly get started. The version control can be adapted to specific projects, and all previous versions will be available in a historic archive.

#### **DECISION PROCESS**

Interaxo simplifies dialogue between project participants:

- Avoid unnecessary emails and other timeconsuming elements
- All documentation and decisions are traceable and saved in their own project rooms.
- When a project is completed, the project room serves as a locked archive in which the documentation is available.

### EASE OF SHARING DOCUMENTS

It is easy to search, read, edit and distribute documents and to share them with other project participants.

Everything is secure and traceable, without risk of the information being stopped by firewalls or VPN connections. All documents have version control and access control.

#### WHY CHOOSE INTERAXO FROM TRIBIA

With more than 100 000 users, we are a leading supplier on the market of project tools for IT, as well as for the building and construction industry in the Nordic countries.

With Interaxo I have good control over the work of all actors and project deliveries. All the information is also readily available wherever I am.

It would be unthinkable to run big supply projects without Interaxo now.

-Andres Thyri Senior Project Manager, Artec Aqua Interaxo makes the job so much easier, as all the information is available in one location. That saves us a lot of time. The folder structure simplifies the workflow further with version history, verification and allocation of responsibilities.

- Erling Jensen Property Division, Oslo Havn KF
