

NOON

OUT IS IN.

OUR NATURAL STATE IS TO BE OUT IN IT.

Who decided our lives needed to be insulated from the natural world? That the best way for us to experience nature was by putting our homes on wheels and then luring us to stay inside them with flat screen TVs, air conditioning and microwaves?

Isn't the point of journeying into the outdoors to leave the inside far behind?

At TAXA we think so.

ABOUT

WE CREATE MOBILE HUMAN HABITATS PURPOSEFULLY DESIGNED TO INSPIRE THE JOURNEY TOWARDS AND INTO NATURE.

Habitats that remind us we are part of nature not apart from it, in a safe “don’t become a bear snack” kind of way.

Where you have everything you need but not more.

Where every design decision has purpose, often multiple, and architectural thinking guides how our mobile human habitats encourage us to integrate, engage, and interact with the natural world and one another.

It is an ethos our founder Garrett Finney, an award winning designer and former senior architect for the Habitability Design Center at NASA has built into every single TAXA product.

FINNEY PHILOSOPHY

WHY WE CAMP.

We believe there are path people and there are map people.

Path people never veer off it, that's why it's so beaten down.

Map people might get lost now and again, but they know how to find their way, and find themselves along with it.

Our habitats are built for map people or path people who get lost.

We design our habitats for people who believe it is the journey towards nature and what it teaches us about ourselves that is as important as where we camp.

To us, what we bring along on the journey should be grounded in intent and purpose. Because getting out and exploring the world shouldn't feel like being at home. It should feel like being not at home. Therein lies the adventure.

Outwards and onwards,
Garrett Finney
Founder and CEO

DESIGN

THE CHOREOGRAPHY OF LIFE IN SPACE.

Working for the Habitability Design Center at NASA taught us to think about space and how it is used in very human terms. Every TAXA habitat design begins with an outline of all the things we imagine people need to do with it. We think about everywhere they will take it and everyone who will be using it.

Tall, short, thick, thin, young and old. We think about all of us and how we fit and move. We build full scale mock ups of cardboard and 2x4s and get our biggest and smallest into the mock up to observe them and ask them questions. We talk about cooking and sleeping and weather and fishing and hunting and watching shooting stars and parents staying up later than their kids (or the other way around). We talk about bathroom use and lovemaking and muddy dogs and bed wetting kids and reading glasses. We talk about safety and security. We talk about blending in to the eco-system of parks and campgrounds and highways and Forest Service roads and garages. We talk about solar power and camping under a forest canopy.

We talk about not making a disposable product. And then we stop talking and start making.

BUILD

ALL THE INSIDE YOU NEED TO ENJOY OUTSIDE.

We build every TAXA habitat to put you right where nature intended, outside.

Every TAXA product is made with proven, durable materials that last. And drawing on our NASA roots, we're proud to manufacture exclusively in our home city, Houston, Texas and employ our neighbors in the community.

The result is high performance, robust habitats that allows you to make it your own in imaginative ways. Inspired by space stations and bikes and boats, we're big believers in multi-purpose functionality that allows you to adapt them as you see fit.

It's why TAXA structures are exposed and little is hidden. We want you to be able to take your imagination along for the journey and innovate along the way.

INNOVATE

WHAT THE JOURNEY TEACHES US GOES INTO EVERY TAXA HABITAT.

TAXA mobile human habitats look different from anything else on the road because they are different. It's a difference born of purpose and what the journey teaches us going forward.

Our philosophy on innovation is we're never done innovating. And neither should you be.

Every TAXA model we make is a laboratory for you to tinker with, expand and expound upon and discover the best way for you to be out in it. Because being outside provokes a lot of questions and only you will have the right answers for you.

**EVERYTHING YOU NEED,
NOTHING YOU DON'T.**

Lightweight and rugged, Cricket is the perfect blend of sophisticated design and purpose that's towable by many four cylinder engines. With sleeping room for two adults and two children. TAXA's NASA-inspired design and integrated plumbing and electrical systems prepare you for excitement wherever the journey takes you.

OVERVIEW FEATURES

**15' LENGTH: EASILY NESTS
IN A STANDARD GARAGE**

DRY WEIGHT: 1,733 LBS

SLEEPS 2 ADULTS + 2 KIDS

**POP-UP ROOF FOR
OPTIMIZED VENTILATION
AND PROTECTION**

EASILY TOWABLE

Both lightweight and rugged, Cricket is towable by many four cylinder vehicles. With a length of only 15 foot and dry weight of 1,733 pounds, you can tow it almost anywhere.

ROOM TO EAT, SLEEP AND RELAX

Cricket has sleeping room for two adults and up to two children, along with TAXA's NASA-inspired design. With comfortable and secure interior space, integrated plumbing and electrical systems, and other thoughtful refined design elements, it's ready for wherever the road may lead.

SUPERIOR CROSS VENTILATION

Four swing windows with shades and screens and five mesh windows in the upper tent panels allow wide-open views and fresh breeze from every angle. It's the perfect habitat for where the indoors and the outdoors converge.
