

In recent weeks the discussion of the COVID-19 outbreak has become foremost in the minds of everyone. We at International Bonded Couriers, Inc., share these concerns and wish to communicate actions we are taking to insure the safety of our employees and clients.

Along with the universally expected hand-washing, and minimizing group contacts, we are expending additional resources to clean and disinfect common areas, and vehicles where there is frequent hand contact.

Concerns about contact with packages and shipments have been addressed by the World Health Organization (WHO), stating that it is safe to handle packages even if coming from places exposed to the virus.

As government actions are taken which impact international trade we will continue to make adjustments to our operation to continue providing the service expected and required by our customers.

For your convenience, below is a link to the World Health Organization:
