

# Recipe Conversions

Melissa's favorite macaroni and cheese recipe makes enough for her to serve her family of 4. Today, she only needs enough to make dinner for herself.

Multiply each ingredient's amount by  $\frac{1}{4}$  to calculate how much she needs.

<i>Measurement</i>	$\times$	$\frac{1}{4}$	<i>Ingredient</i>
8	$\times$	$\frac{1}{4}$ = _____	oz. dried macaroni noodles
2	$\times$	$\frac{1}{4}$ = _____	cups milk
2	$\times$	$\frac{1}{4}$ = _____	Tbsp. flour
8	$\times$	$\frac{1}{4}$ = _____	oz. shredded cheddar cheese
$\frac{1}{2}$	$\times$	$\frac{1}{4}$ = _____	tsp. salt
$\frac{1}{4}$	$\times$	$\frac{1}{4}$ = _____	tsp. pepper

### Now It's your turn!

Write your favorite recipe on the card above. Make sure you know how many people it serves! Then, in the conversion table below, multiply the amounts of each ingredient by **a fraction** to make the recipe **for less people**, or a **whole number** to make it for **more people**.

#### Examples:

- If you have a recipe that serves 12, but you only need to serve 6 people, you would multiply the ingredients listed by  $\frac{1}{2}$
- If you have a recipe that serves 6, but you want to serve 12 people, you would multiply the ingredients listed by 2

### Conversion Table:

<u>Measurement</u>	<u>x</u>	<u>Ingredient</u>
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____
