

## How Efficient is Your Usage of Office 365?

We can help you improve it with our new Office 365 Adoption Maturity Model!

### The Problem

When it comes to Office 365 - organizations choose to roll out specific workloads (e.g. OneDrive or Teams) at a pace that makes sense to them. Often, being so 'workload focused' can cause companies to lose sight of some very important 'umbrella topics' related to overall platform adoption maturity. In these current times, important questions to ask yourself are:

- *Is your deployment fully secure?*
- *Are there cost savings opportunities now that you have O365?*

### The Solution

As part of our new [Spyglass 365](#) offering, we have developed an Office 365 Adoption Maturity Model. We have created a scorecard that allows your organization to be plotted on the curve based on defined scorecard components. It's important to know where you are on the maturity curve - and more importantly, what sorts of actions you should consider to improve your position on the curve.

Being higher up on the curve is better for many reasons. First, it improves security and reduces risk. Next, it maximizes the return on your investment. It also reduces redundant solutions and systems while attracting and retaining talent. We can help you get to the top of the curve if you are not already there!

### Spyglass MTG Can Help!

We can help improve your Office 365 usage! [Contact us today!](#) Read more about this offer in our recent blog post [here!](#)

### Maturity Model Levels:

- Level 1- Concept
- Level 2- Core
- Level 3- Enhance
- Level 4- Optimized
- Level 5- Innovative

### Maturity Model Scorecard Components:

- Strategy
