

The Mothership brand

The spacing around our logo should be the same height of our logomark. This clear space helps keep our logo from feeling cluttered. No additional artwork should be present within the boundaries provided. Please do not change the rotation, aspect ratio, spacing, or use any colors besides our brand colors in practice.

We always use our full logo (logomark and name) when showing the Mothership name. However, the logomark may be used by itself. Mothership is one word with a capital M.

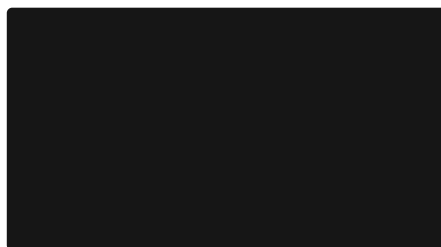

Brand colors

Our primary brand colors that we use for our logo and action items in our products.
