

## About Mothership

Mothership Technologies, Inc. is a freight technology company. Dedicated to making same-day delivery for local freight the new standard for businesses, Mothership is a platform that allows clients to obtain an instant quote, book a truck on-demand, track shipments from hub to hub in real-time and deliver the same day. Partner carriers can use the Mothership App to optimize shipment routes, prevent wasted cargo space and fuel, and fill in the gaps between their normal contract jobs, typically earning more per hour. Headquartered in Los Angeles, Mothership ships nationwide, and same-day local shipping is available in California, New York, New Jersey and Pennsylvania.
