

PURE & DRY BY AERUS

DEHUMIDIFIER

PURE & DRY BY AERUS - DEHUMIDIFIER

The Pure & Dry by Aerus is a high-performance basement dehumidifier and air purifier. Its compact design can be used in multiple applications to remove humidity in damp, cool spaces up to 1,000 square feet. Optional HEPA and carbon filters can be used to clean the air and remove odors. While energy efficient, its high capacity moisture removal can remove up to 8.75 gallons of water per day via a removable water bucket.

HOW IT WORKS

- The electronic control board controls the desired relative room humidity
- Air passes through the filters and comes into contact with a cooled surface
- Condensed drops of water form on the cooled surface
- The condensed drops collect in the removable water bucket
- The air then passes through a warm exchange and returns to the room cleaned and dehumidified

SPECIFICATIONS:

Power consumption	740 watts
Air Flow	176 CFM
Dimensions	16"W x 26"H x 10 1/2"D
Weight	47.4 lbs.
Warranty	1 year

FEATURES

- 5 operating modes
- Optional HEPA and carbon filters
- Optional drain hose outlet
- Electronic circuit controls
- Automatic digital humidistat
- Control relative room humidity by 5% increments
- Low energy consumption
- Quiet operation
- Compact, low profile design
- Automatically restarts if power source is interrupted
- Self-cleaning to remove any bacteria and mildew buildup
