ADVANCED MONITORING FOR EMPLOYEES WORKING FROM HOME
MAXIMIZED PRODUCTIVITY, ENGAGEMENT & SECURITY

SEE WHO'S THRIVING & WHO'S STRUGGLING

Regardless of whether an employee is in your office, working from home or working from a hotel half way around the world, you can see exactly what they're doing.

Not everyone thrives when working from home. To effectively work form home you need self-motivation, self-direction and self-discipline. Additionally many people struggle with the isolation from their colleagues.

As a manager you need the visibility to see;
- What hours employees are working
- How much they're working
- What they're spending their time on
- Do they need coaching
- Do they need training
- Is an employee struggling with the change to telework
- Does a group or department need attention
  - Do they need more structure or more communication
 - Does a manager need help managing their newly remote team

Veriato employee monitoring software solutions give you visibility into all of your employees' activity on PCs, Macs, Chromebook and Android devices.

Productivity Metrics at a Glance

The Veriato dashboard lets you quickly see daily and weekly metrics. Below you'll see a weekly view showing who's productive, who's not, and the people that are barely using their computer. Not only can you see what an individual is doing, but you can also see how they're doing in relation to their peers.

Weekly Productivity Stats (Veriato Vision shown)

● Productive ● Unproductive ● Neutral ● Idle

USER	WORK SCHEDULE	ALERTS	TOTAL LOG IN TIME ⓘ	ACTIVE TIME	IDLE TIME	PRODUCTIVITY SCORE ⓘ	EMPLOYEE RANK	ACTIVITY TIMELINE	SCREENSHOT VIEW
Andy Bernard	40 hr	🔔 87	37:01:59	22:48:00	17:12:00	-1004	7/7		
Angela Kinsey	40 hr	🔔 67	37:36:20	21:02:24	19:00:07	619	1/7

Complete Control

You'll have granular control over what activities and programs are monitored for each employee. Once the Veriato monitoring software is deployed on the company's PCs, Macs and Androids, you can remotely monitor by department, group or individual.

Real-Time Alerts

Catch potential problems in real-time. Set up custom alerts to inform you when employees attempt to visit restricted sites, download non-productive programs or apps, or spend all afternoon on Facebook!

Insider Threat Security

Get alerted about suspicious and restricted activities in real-time, so that you can react quickly to protect your critical data (e.g., client lists, financials, customer data, etc.). Veriato continually analyzes all employees' behaviors to identify actions that are indicative of a security risk.

DEPLOYING TO REMOTE DEVICES

Veriato agents are remotely deployed out to Windows, Mac, Chromebook and Android devices from the central management console. As soon as the Veriato agent is installed on the remote device, it begins analyzing and recording all device activity.

Veriato has both on-premise and cloud versions, so you can choose the solution that's right for your organization. You can run Veriato software in silent mode, making it imperceptible to the end user.

If you need technical assistance deploying Veriato, we have experienced partners worldwide that can assist you in quickly rolling out your Veriato remote monitoring solution.

WHEN MANAGING A REMOTE TEAM KNOWLEDGE IS POWER

It's a huge challenge to suddenly restructure a business to accommodate home workers, and at the same time maintain a productive business. The ability to understand what employees are doing is crucial when managing any team, especially a remote one.

Visibility into employee activity allows you to:

- Measure employee effort
- Reduce security risk
- Identify training needs
- Maximize productivity
