

OUR APPROACH TO WI-FI

KEY BENEFITS & FEATURES:

- Protection from Over Spending on Wireless
- Ensure NO Dead Spots
- Perfect Design Every Time
- Confirmation of ubiquitous wireless (post install)

Using the most advanced software available to complete pre-proposal surveys, Matrix Networks can ensure a seamless deployment of your wireless network by sampling all interferers on your airwaves, even those caused by non-Wi-Fi devices. The use of this cutting edge technology allows Matrix Networks to eliminate or engineer around problem issues and deliver a reliable, long lasting solution for your wireless needs. Once deployment is complete, the same software can be used to perform a post-install survey to provide analytics like signal proliferation, interference, data rates, and much more. The ability to see a pre and post install view of your wireless network will ultimately give you the assurance and peace of mind, knowing the job got done right and you got what you were promised.

OUR GUARANTEE

The Matrix Networks Wi-Fi Guarantee

Matrix Networks guarantees that our solution will provide full Wi-Fi coverage for all areas stipulated by the client. Using our industry leading software, Matrix Networks will survey the area, create the design, and professionally install the wireless network. Post-installation, we will verify the design's integrity, stability and coverage using this same software.

Our guarantee to you: At the time of the post-installation survey, any changes necessary to provide agreed-upon coverage will be the **sole responsibility** of Matrix Networks.

Guarantee Disclaimers

1) A pre-installation site survey with a Matrix Networks certified technician must be performed to qualify for this Guarantee. Client must sign off on the results. Changes to the physical environment after the pre-installation site survey will void this guarantee.

2) Post-install testing will be performed using Matrix Networks laptop connectivity; Matrix Networks cannot guarantee the power of various mobile device radios.
