

SNP [IFS] | SNP Interface Scanner

By Appointment

Target group

Partners and (new) customers of SNP IFS

Objectives

In this training you will get to know the functions of the SNP Interface Scanner, beginning with the installation and the required configuration up to the different evaluation possibilities. The SNP delivery queries will be considered as well as the possibility to create your own SQL queries. Furthermore, different possibilities to maintain data and the creation of Visio graphs will be discussed. The topics will be explained using examples in a demonstration system.

Training content

- Installation
- Setup
- Central query
- General query
- Tables
- Administration

Prerequisite

Basic knowledge of SAP® products, basic knowledge in SQL
