

## Press Release

### Award for SNP's annual report

Annual report published in „Beispielhafte Geschäftsberichte 2010“ (Best practice of annual reports 2010) of the German edition Deutsche Standards EDITIONEN.

Heidelberg, September 07, 2010 – the editors of the German publishing house Deutsche Standards EDITIONEN incorporated SNP's annual report into its compendium “Beispielhafte Geschäftsberichte 2010.” This selection of the best and most remarkable annual reports is released in the 13<sup>th</sup> edition already. SNP is a leading provider of software and software related services for the transformation of SAP systems.

“Our annual report consists of a number of different components. We focus on values like honesty, distinctness, and transparency – because this is what our shareholders and stakeholders expect from us. As it seems, we managed quite well. Therefore, we are truly happy this year's publication was repeatedly well received,” says Petra Neureither, CFO of SNP AG.

SNP's annual report convinced the editors with its futuristic and clean design. One major reason for the publisher's decision was also that SNP succeeded in explaining clearly its complex business of SAP system transformations to the readers.

#### Informationen zu SNP

SNP is a leading provider of software and software-related-services for transformations of SAP systems required in the wake of mergers and acquisitions, splits, harmonizations, or system upgrades. For these transformations of a company's IT processes, SNP offers SNP Transformation Backbone® (SNP T-Bone), the world's first standardized software that automates and comprehensively supports transformations of SAP solutions. SNP also uses this software for its unique consulting approach, Business Landscape Transforma-
