

Press Release

SNP Transformation Backbone® Achieves Oracle Validated Integration with Oracle's JD Edwards EnterpriseOne

Jersey City, USA / Heidelberg, March 11, 2014 – SNP GL Associates (SNP), a leading provider of automated enterprise resource planning (ERP) transformation software solutions and a Gold level member of Oracle® PartnerNetwork (OPN), today announced it has achieved Oracle Validated Integration of SNP Transformation Backbone® Release 13 with Oracle's JD Edwards EnterpriseOne 9.1.

For more than 30 years, companies have relied upon SNP to enable ERP transformations driven by mergers and acquisitions, corporate restructurings, consolidations and chart of accounts reorganizations, helping to save them significant effort, time, and costs while minimizing risk.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. Transformation Backbone's integration with Oracle's JD Edwards EnterpriseOne 9.1 offers an automated, accurate transformation of master and transactional data while preserving system integrity. Companies can now perform major complex data transformations in considerably less time.

"It's all about a scalable, agile approach to strategic change within the ERP system.", said Matt Geffken, director, Business Landscape Transformations, SNP GL Associates. "Our clients are looking for streamlined reporting, business process harmonization and rapid accounting-close cycle times. Using Transformation Back-

Corporate Communications ^{SNP}

bone, SNP's clients realize these outcomes through complete data history transformation, migration, consolidation, and cleansing, all within the industry-trusted standards set by Oracle Validated Integration."

"Achieving Oracle Validated Integration gives our customers confidence that the integration between SNP Transformation Backbone and Oracle's JD Edwards EnterpriseOne is functionally sound and performs as tested," said Kevin O'Brien, senior director, ISV and SaaS Strategy, Oracle. "For solutions deployed on-premise, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

SNP's proprietary tool, Transformation Backbone, can help reduce the duration and total cost of IT transformation significantly for clients running Oracle's JD Edwards EnterpriseOne 9.1 systems, worldwide. For many organizations, transformation projects have required software development and costly, time consuming testing cycles. By using this automated process, Transformation Backbone can help eliminate development and reduce the staffing and timeframes needed for transformation.

About SNP GL Associates

SNP GL Associates, the Americas division of SNP AG, helps companies react rapidly to changes in their business environment. SNP Transformation Backbone® enables companies to adapt their IT landscape more quickly and economically to changing marketplace conditions. SNP Transformation Backbone is one of the world's first standard software solutions that automatically analyzes changes in IT systems and implements them in a standardized way. The solution is based on the experience SNP AG has gained in more than 2,500 projects worldwide with its software-related services for Business Landscape Transformation®.

About Oracle Validated Integration

Corporate Communications ^{SNP}

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of complementary partner software products with Oracle Applications and specific Oracle Fusion Middleware solutions have been validated, and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations. Partners who have successfully completed the program are authorized to use the “Oracle Validated Integration” logo.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success.
