## First S/4HANA Digital Transformation in Australia pioneered by Land Registry Services using SNP BLUEFIELD™

**Heidelberg, June 25, 2019** – SNP Schneider-Neureither & Partner SE, a leading global provider of business transformation solutions specifically to SAP® landscapes, today announced a successful implementation of SAP® S/4HANA project with New South Wales Land Registry Services (NSW LRS), who operate the NSW land title registry on behalf of the NSW Government in Australia . This is the first next generation enterprise conversion in Australia that was orchestrated utilizing SNP BLUEFIELD™ - the automated digital transformation to SAP® S/4HANA digital core.

NSW LRS operates the NSW land titles registry, which underpins the state's secure, efficient and guaranteed system of land ownership. NSW LRS create and maintain land titles information and sell land information products and services. The community, business and government rely on their data and information for a variety of purposes including land management, conveyancing, property development, investment, local planning, state economic and social development and historical research.

The SAP® S/4HANA project for NSW LRS, internationally recognized as a leader in land administration, was triggered by a strategic business and IT decision to acquire a cost-effective, fast and risk-free solution to convert their existing SAP ERP 6.0 | EhP7 | on-premise to S4/HANA 1709 | AWS Platform. The project was in association with the key local partner Acclimation Australia. The key challenge for all project parties were to execute multiple project like Data Base change, NewGL implementation, Unicode conversion and move into the cloud in a single step.

“At NSW LRS, our strategy is to maintain high agility in a competitive environment by making rapid changes in our technology landscape, while keeping data secure and our processes compliant. For our conversion to SAP® S/4 HANA, we were looking for a software solution that could address the challenges of a complex project to migrate, upgrade and enhance features and data in a single go-live project with a new optimized S/4 as well as adherence to the aggressive timeline targets associated with project of this magnitude,” said Lesa Tobias, NSW LRS' Chief Information Officer.

“We selected SNP BLUEFIELD™ to execute this project because of their success with business transformations and their proven ability to deliver multiple projects in a single step within 6 months, with business downtime of less than 36 hours with minimal cost and risk“, explained Ms Tobias.

“Enterprises like NSW LRS are transforming continuously. NSW LRS’ move to S/4HANA using BLUEFIELD™ is a testimony to our expertise in delivering end-to-end go-live SAP Landscape transformation projects. With SNP’s BLUEFIELD™ approach to SAP S/4HANA, we enable enterprises to convert existing SAP landscape in a single step project and allow them to fulfil their strategic objectives with greater speed and extremely low risk, said Marcus Scott, Managing Director, SNP Australia Pty Ltd.

“The success factor was to orchestrate rapid blueprinting and fit-gap analysis to analyze critical business requirements via SNP automated scan technology from LRS’ SAP landscape and simulate to the business transformation requirements so that the outcome is predictable and risk-free. The CIOs and decision makers realize and appreciate that only highly automated software-based solutions like SNP’s can close the gap between business strategy & IT execution”, he added.

SNP BLUEFIELD™ involves an automatic scan of the system landscape to identify objects, customisations and usage. Automatic process scans predict S/4HANA risks in advance which can be mitigated as needed. Using its proprietary SNP Transformation Platform Software and drawing upon experiences from over 10,000 successful transformation projects with many of the world’s greatest companies, SNP uses a blend of smart services and automation from their own software portfolio that can reduce the gap between the business and technology to near zero, accomplishing in days and weeks what can often take months or more.

SNP is SAP certified and an SAP OEM Partner. SNP customer engagements have included some of the largest and most significant mergers, acquisitions, and divestitures. The company’s roster of customers includes Siemens, Kellogg’s, L’Oreal, Esprit, Honda, and HP Enterprise.

## About NSW LRS
