Breach Prevention Workshop for Municipalities

Municipalities carry sensitive data on every member of their population, and this data is worth money to hackers, making municipalities a prime target for ransomware attacks. With such sombre examples of Wasaga Beach and other municipalities in the news, how do you protect and secure your devices to make sure your municipal data stays safe?

WHAT IS BREACH PREVENTION WORKSHOP FOR MUNICIPALITIES?

ProServeIT's Breach Prevention Workshop for Municipalities uses security features inherently associated with Office 365. Our experienced team can quickly deploy the necessary tools, like EM+S, ATP, and MFA, that effectively protect against ransomware attacks. This solution is not dependent on customers already being deployed on Office 365, and is tuned to quickly increase your municipality's security posture.

DELIVERABLES & ACTIVITIES

With our Municipality security solution offering you'll receive:

• Secure, email-based ransomware protection to prevent encryption of your files and eliminating the need to pay hackers to get it back.

• Deployment of multi-factor authentication to stop hackers from impersonating executives and encrypting files for ransom.

• Deployment of self-service password resets to allow users to change passwords frequently and simply.

• Deployment of mobile device security solutions to secure corporate data.

• A security roadmap to ensure future initiatives are aligned.
