

Calling Plans in Office 365: Pilot Program

With adopting Microsoft Phone System and Calling Plans, you can switch to Voice-Over Internet Protocol (VoIP), allowing you to make calls over the Internet (instead of a regular phone line). This reduces costs and maintenance requirements and introduces work-from-home or remote office capabilities into your organization.

After you've gone through our one-day Discovery Workshop, the next step is to participate in our Pilot Program.

**LEARN ABOUT THE ONE-DAY
DISCOVERY WORKSHOP >>**

DELIVERABLES & ACTIVITIES

This pilot program will provide you with everything required to deploy a Microsoft Phone System with up to 5 users within in your organization. This includes:

- The purchase and implementation of the appropriate Office 365 licensing.
- Enablement of your new Office 365 tenant and assigning licensing that will support Microsoft Phone System for up to 5 new user/phone accounts.
- Conducting remote product and functionality testing of the new services.
- Staff training on the new online portal and management functions.
