

Breach Prevention Solution - MFA

Microsoft Multifactor Authentication (MFA) helps to reduce the chances of a successful attack by adding an easy to use, non intrusive second layer of identify verification.

What does MFA solution include?

- We will enable your tenants MFA services for up to five users.
- We will configure one access policy.
- We will guide you through the installation of the Authentication Application on the five user account devices.
- We will provide training to the five users to show how MFA improves your organization's security posture.
- We implement our MFA, Breach Prevention Solution within one full business day, working directly with you in your environment.
- **Recommendation:** the five attendees should consist of senior management and IT to start.

Assumption

- You are already using Office 365 (Business Essentials, Business, Premium, E1, E3, E5, or F1) and it is running properly.
- You have an Android or iPhone that is somewhat current.
- When we work with you to install the Authentication Application you will have your phone with you.
- New recipients of the MFA service will all be available at the same time for assistance with phone configuration and education.
- You will have freed an hour in your calendar to participate in the education session.

Out of Scope

- Fix anything that was broken before we deploy our Breach Prevention Solution.
- Build or deploy anymore than what we described above.
- Visit your location on a regular basis (our solution is implemented remotely).
- Work outside of normal business hours of 9am - 5pm.

Why work with ProServeIT?

Full Stack Technology Partner

We help organizations start their digital journey with Cloud and security and evolve their digital footprint to applications and managed services.

Security First

We apply a security lens to everything that we do by helping organizations manage advanced security risks and secure their identity, data, and devices.

Just In Time Technology

We help organizations maximize their technology ROI by ensuring that all technology purchased is done so when needed & is fully adopted by all users.
