

# ProServeIT's Security Workshop

ProServeIT's Security Workshop, designed for security decision-makers (i.e. C-Level and IT Security leadership), will help you to assess your security landscape, address your most pressing security goals and challenges, and provides you with an immersive experience that shows you the security vision and capabilities of Microsoft for your organization.

## Deliverables & Activities

This all-inclusive Security Workshop will include:

### Pre-Engagement

- Define scope, identify key stakeholders, and align expectations to guide the on-site Workshop and deliverables.

### Threat Check

- Prior to the on-site workshop, our experts will set up & configure a Threat Check license, which will help to discover any potential threats in your Microsoft 365 Cloud environment & make recommendations on mitigating threats.

**On-Site Workshop** - Our team will host an on-site Workshop covering the following:

- Microsoft 365 Security Tools Overview
- Discovery Session
- Threat Check Findings
- Customer Immersion Experience
- Recommendations & Next Steps
