What is AZ5000 for Nonprofits?

Extend Your Server Room to the Cloud!

It's a program built on Microsoft best practices that provides you with a proven, safe and cost-effective solution to begin your journey to the Cloud! With AZ5000, we help you extend your server room to the Cloud, allowing you to manage your physical and environmental risks that can lead to data and revenue loss.

AZ5000 Benefits:

AZ5000 can help your nonprofit:

- Stay relevant and current on new Cloud best practices.
- Maintain control of your IT budget.
- Develop additional skills.

AZ5000 Roadmap

Azure Security Foundation

ProServeIT begins by laying the foundation for a secure Cloud environment, including correct Azure setup, security design, and management. This ensures that:

- There is no loss of management control.
- You have visibility and control over your Cloud spending.
- You build a strong Cloud foundation.
- You enjoy stable and scalable Cloud environment.

1) Managed Site Recovery

- Data replication to the Cloud
- On-demand activation of disaster recovery
- Full site disaster recovery
- Mitigate risk & reduce costs
- No loss of management control

2) Deploy Servers in Azure

- Get your data centre connected to the Cloud
- Put your first workload up in the Cloud
- Start a new project instantly on Azure
- Leverage a consumption & planning dashboard
