

Fully-Managed **Disaster Recovery** Program Offer for **Nonprofit** Organizations Includes:

- Up to 3 months of service at no charge, up to \$5,000
- Complimentary consultation
- List of recommendations
- Optional fully-managed add-on

Why is a Disaster Recovery Solution Necessary for Your Nonprofit?

Businesses are increasingly dependent on technology, yet today's environments are becoming increasingly difficult to protect. Multiple disaster recovery solutions are often required to address the broad array of environments and applications. This can lead to a lack of trust in your existing plan:

- Has it ever been tested?
- How long will it take?
- How do we fail over?
- Will it actually work?

Orchestrate your nonprofit's disaster recovery plan with Azure Site Recovery!

With Azure Site Recovery (ASR), you can proactively protect your environment. Enjoy peace of mind knowing that your environment is fully protected! Some of the many benefits you can get from ASR include:

- Simple, automated protection and disaster recovery in the Cloud
- Orchestrated Disaster Recovery as a Service (DRaaS)
- Replication and disaster recovery to Azure
- Continuous health monitoring with Site Recovery
- Customizable recovery plans
- Predictable migration path from VMware virtual machines to Azure

Why ProServeIT's Fully-Managed DRaaS Program?

We've turned this complex approach into a simple, comprehensive, and robust solution that can be customized to meet your nonprofit organization's unique needs. ProServeIT's DRaaS Program includes:

- Orchestrated disaster recovery as a service (DRaaS)
- Replication and disaster recovery to Azure
- Continuous site replication monitoring and remediation
- Quarterly backup verification (non production)
- Manage site during failover while invoked
