Microsoft 365 F1 for Retail Sector

Microsoft 365 F1 brings together Office 365, Windows 10, and Enterprise Mobility + Security to create a complete, intelligent solution that empowers your firstline workforce (cashiers, sales associates, store managers, and warehouse operative) to be creative and work together, securely. With this complete solution, you can easily on-board, train, and upskill them, digitize business process, and effectively manage risk and cost.

Assessment/Workshop Package

We will work with you to understand the benefits your firstline workforce (cashiers, sales associates, store managers, and warehouse operative) could realize with Microsoft 365 F1. Looking at your organizational numbers; how many staff you have, average salary, hours worked per week and attrition rates; we will provide you with a value assessment based on the McKinsey Social Economy Report.

Based on the assessment, we suggest solutions that fit your needs and brought success to other public sector organizations who had similar challenges.

GET YOUR ASSESSMENT TODAY>>

Deployment Package

If you want to deploy the suggested solutions and tools after the assessment, we will work with you to successfully deploy them. The solutions will be customized to best fit your needs and budget. And we will suggest a deployment roadmap to ensure your organization is fully on-board with Microsoft 365 F1 in the most time and cost efficient manner.

With options for extremely easy-to-use staff on-boarding, focused computer-based training materials, and bespoke HR solutions, you can now connect your firstline workforce with modern communication and collaboration tools.

How We Help Retail Sector's Microsoft 365 F1 Deployment

Employee Retention

Why it's important
91% of first year workers are retained if they have a good on-boarding process.

What you get
Enable easy access to onboarding documentation such as policies, training and co-worker information.

Security

Why it's important
Secure and protect your employee identity, devices, and data from security breaches.

What you get
Advanced Threat Analysis and reporting for all identities, authentications, workstations, and laptops, plus antivirus protection for all devices.

Employee Communication

Why it's important
Improve security and lower breach remediation costs with more secure access to company IP and systems.

What you get
Manage employee access to their own, and corporate devices, and control digital identities through Enterprise Mobility + Security.

Shift swapping / StaffHub

Why it's important
Lower payroll costs or increase output with modern tools that enable efficient task management.

What you get
Enable Microsoft StaffHub to facilitate the creation, updating and management of your firstline worker's schedules and tasks.
