

Is Your Refrigerator Running?

Preventing Headaches with Proactive Maintenance

As a facilities manager, you've probably heard this joke* a thousand times. You've also probably heard the phrase, "If it's not broken, don't fix it." While it's true, you also know that while things are running fine today, they might have big problems hiding just under the surface.

Proactive maintenance is an important part of any successful FM program. The benefits are obvious: keeping key items trouble free will slash the number and size of emergencies you have to handle. Proactive maintenance keeps your company open for business and making money. And it keeps your facilities safe for employees, customers, and everyone else who walks through your doors. That drives immediate bottom-line results.

Corrigo has extensive Preventative and Recurring Maintenance capabilities that make scheduling and performing maintenance quick and easy.

With Corrigo PM / RM, you can:

- **Schedule maintenance for specific pieces of equipment throughout the year** – whether it's one piece or multiple, you only have to schedule it once.
- **Automatically create, assign and send WOs to providers on a scheduled date.**
- *You can even assign maintenance to multiple techs or vendors at once.*
- **Track PM compliance and know that scheduled work is completed to standards.**
- **Set procedures for each instance of PM** – you'll always know what's being done and when.
- **Got a complex PM program? Making major changes to scope or schedule? You can upload massive changes easily, saving a ton of time.**

Corrigo makes it easy to schedule maintenance and catch minor issues before they turn into metaphorical, or literal, fires. If you are interested in learning more about our PM / RM offerings, contact us to schedule a demo and see how Corrigo can help you.

"You can set up multiple work orders to be issued at same time on a day. You don't have to think about it - it just happens, and your crew is automatically notified."

- Andrea Belshaw, Project Coordinator, Energy Network Services, Inc.

**In case you haven't heard the joke: "Is your refrigerator running? Better go catch it!"*
