

DESTINY CONNECT

Ellucian Banner[®] Connector

Powered by Axiom Elite[®]

Exchange data between Destiny One and Ellucian Banner

About

The Destiny Connect Ellucian Banner Connector leverages Axiom Elite, the data management hub for higher education, to provide out-of-the-box integration capabilities to exchange data between Destiny One and Ellucian Banner. This is often needed when the main campus SIS is the system of record for classes and student records. This connector ensures that data flows across the systems.

Benefits

Axiom is a certified Ellucian partner. The Axiom Elite solution benefits Destiny Solutions' customers in the following ways:

- Reduces the effort associated with creating new integrations and supporting existing integrations.
- Provides the pre-built integration templates that handle the business logic and object mappings between the source and destination systems.

Connector Details

The connector provides batch file integration for these processes and events:

- Credit course creates and credit and non-credit course updates (Banner to Destiny One)
- Non-credit course creates and updates (Destiny One to Banner)
- Credit course section creates and credit and non-credit CRN updates (Banner to Destiny One)
- Non-credit course section creates and updates (Destiny One to Banner: profile, schedule, fees)
- Student creates and updates (Destiny One to Banner)
- Student creates and updates (Banner to Destiny One)
- Non-credit enrollments (Destiny One to Banner)
- Financial GL (Destiny One to Banner)
- Grade creates and updates (Destiny One to Banner)

The batch export files are produced by Destiny One on a scheduled basis and sent to the Axiom Elite middleware product, which processes each record and uses available Banner services to update the applicable data within Banner. Axiom Elite also responds to Banner data updates to produce batch files for import back to Destiny One on a scheduled basis.

Availability

This connector is separately licensable and pricing includes implementation and configuration services provided by Axiom. Student Information System licenses must be purchased from applicable vendors. A professional services engagement may be required to add events or modify integration templates. Available in mid 2018.
