

## Northway Biotechpharma signs a Manufacturing & Supply Agreement with Affibody

Vilnius, Lithuania, and Solna, Sweden – February 06, 2020 – Northway Biotechpharma, a leading biopharmaceutical Contract Development and Manufacturing Organization (CDMO), and Swedish biotech company Affibody, announced today that they signed a Manufacturing & Supply Agreement.

Under the scope of this agreement, Northway Biotechpharma will manufacture cGMP batches of the Drug Substance, a therapeutic protein, for Phase 2 clinical studies. After the process was previously transferred to Northway Biotechpharma which has produced cGMP batches for Affibody's clinical Phase 1 study, both parties have decided to extend their cooperation.

*"We are very proud to be part of the continuing development of this exciting project and that we can support Affibody with further cGMP manufacturing for their Phase 2 needs,"* said Dr. Vladas Bumelis, Executive Chairman of the Board of Northway Biotechpharma.

Dr. André Markmann, VP Business Development for Europe of Northway Biotechpharma, informed *"Since we started the cooperation with Affibody on their therapeutic candidate, the technology transfer, scale-up and cGMP manufacturing have been extremely successful. We are therefore very happy that Affibody honors our cooperation by signing a supply agreement for their Phase 2 requirements."*

*"We appreciate the flexible nature of our collaboration with Northway Biotechpharma and looking forward to a successful continuation of the cooperation."*, said David Bejker, CEO of Affibody.

**About Affibody** - <https://www.affibody.se>

Affibody is a clinical-stage Swedish biotech company with a broad product pipeline focused on developing innovative bi- and multi-specific next-generation biopharmaceuticals based on its unique proprietary technology platforms: Affibody® molecules and Albumod™.

The company operates a focused experimental medicine model and currently has three clinical-stage programs. The first two are therapeutic programs that target psoriasis, and B-cell driven autoimmune diseases respectively. The third program is a diagnostic imaging program that is directed primarily towards metastatic breast cancer.
