

PANTSUP EASY

Pants Up Easy: Clinician Benefits Statement

Pants Up Easy enables wheelchair users & others with mobility impairments to pull up their pants independently. Users lift themselves slightly above the wheelchair or toilet seat, leaving hands free to complete lower body dressing, while relieving the therapist or caregiver from much of the typical lifting as they assist clients. See users of all ages in our Pants Up Easy YouTube videos.

Many important benefits:

- Increased independence with lower body dressing / clothing management when toileting.
- Less time required for the user to complete LB dressing / clothing management which will allow for them to return to their daily routine sooner & with less interruption
- Less risk of experiencing skin breakdown vs. traditional training methods
- Decreased risk of falling off commode or wheelchair, possibly suffering injury.

The Pants Up Easy system mitigates the heavy lifting & unnecessary transfers from the toilet to the wheelchair to the bed, then finally back to the wheelchair, while maintaining user privacy & dignity.

3 Models

- Wall Mount - permanently installed onto any wall.
- Toilet Model - freestanding: placed behind any toilet (no installation required).
- Wheelchair Model - freestanding: assists in the dressing process while in the wheelchair.

Easy Hands-Free Lift System
