MuleSoft Consulting Services

Best of breed integration and development

MuleSoft is a lightweight Java-based enterprise service bus (ESB) and integration platform that allows developers to connect applications together quickly and easily, enabling them to exchange data. With more and more applications migrating to the cloud, businesses are looking for robust and cost-effective methods to connect their business applications. MuleSoft is the leader in API led connectivity, providing faster and seamless integration, light weight and scalable solutions align with your Digital Business Strategy.

Welcome to the World of APIs

As more applications migrate to the cloud organizations are looking for robust and cost-effective methods to connect their business applications. MuleSoft is the leader in API led connectivity, providing faster and seamless integration, light weight and scalable solutions align with your Digital Business Strategy.

- Lack of a comprehensive, transparent and judicious solution that encourages collaboration.
- Capability to coordinate global projects across multiple geographic locations.
- Agility to make informed decisions via real-time analytics and performance reporting.
- Need for mobility and social interaction across portfolios and projects.
- Need for integration with financial, procurement, and other back-office systems in order to connect projects with strategies and delivering to exceed business objectives.

Started with Oracle SOA

ennVee is an implementer and partner for several of our manufacturing clients. Our MuleSoft team designs and implements RAML APIs enforcing state of the art security features. Along with API development, we help clients migrate from Oracle SOA or any legacy integration tool to MuleSoft. From out-of-the-box Oracle SOA services like Oracle Transportation Management to custom integration solutions between Oracle EBS, Workday, Salesforce, Microsoft Dynamics, Service Now At Your Service (AYS), ennVee can help you seamlessly integrate your complex systems portfolio.

Enterprise Application Integration

ennVee specializes in both Oracle and MuleSoft, which benefits clients by providing a multi-layered approach that takes into consideration both sides of the proposed solution. Whether you opt to use Oracle or MuleSoft, we firmly believe that its use pertains to specifically to your IT environment, objectives, and constraints.
