

# Automated Oracle Discoverer Extraction & Migration Tool

Discoverer migrations are complicated and often require a significant investment in terms of time and resources. Using our proprietary ennSight tool, we automatically identify and extract all reports and objects from Discoverer before migrating to any platform in 2-10 weeks.

## ennSight Key Features

- Identifies all Discoverer reports and elements
- Identifies duplicate, triplicate, and obsolete reports
- Automatically extracts SQL from Discoverer
- 2-10-week migration to any platform
- Includes 2 weeks of post-migration support

## Target Platforms

## Our Automated Migration Process

### Assessment and Identification

Our assessment identifies all Discoverer reports including duplicates and triplicates, and generates a time and effort estimate to migrate each report.

### Automated Extraction

ennSight automatically extracts the Discoverer SQL. Extracted objects include:

### Migrate to any platform

The extracted reports are manually migrated to your platform of choice by our team and unit tested.
