

PUPPY PREVENTIVE CARE PACKAGE

WHY IS PREVENTIVE CARE SO IMPORTANT FOR MY PUPPY?

1. **To identify and treat congenital defects**—18% of puppies are born with a congenital defect. These defect can affect growth, development, comfort, and overall quality of life. Many defects or problems can be managed or cured if identified and treated early.
2. **To identify and treat intestinal parasites**—Almost all puppies are born with parasites.
3. **To establish a Baseline**—Getting lab values as a puppy is important for future lab value comparison.
4. **Peace of Mind**

The Package Includes:

- Physical Examination and all core vaccinations
- Complete Organ Function Tests (28 chemistries)
 - ✓ Kidney (SDMA), Liver, Electrolytes, Juvenile Diabetes, etc.
