

Unique, Powerful Electronics for HPC and Signal Processing Now Distributed in USA

PRESS RELEASE - SEP 10, 2015 14:00 EDT

Electronic warfare product distributor Cyntony Corporation and hardware developer Peralex Electronics jointly announce the appointment of Cyntony as worldwide distributor with exclusive rights in the USA.

Cyntony Corporation, a specialty electronics and antenna product distribution company and Peralex Electronics (Pty) Ltd, a world-class creator of sophisticated electronic systems for commercial and defense applications located near Cape Town, South Africa, jointly announced today the appointment of Cyntony as the worldwide distributor of Peralex commercial products. SKARAB, an agile networked extreme-computing platform and ComRad3, a high-performance receiver for passive radar using FM broadcast signals will be offered by Cyntony worldwide. Exclusive distribution rights in the USA for these products have also been granted.

"We are very pleased to have Cyntony represent our products," says Alex Bassios, Director of Peralex, "their competence, dynamism and integrity are a good match for Peralex and will ensure the US market excellent service."

About Cyntony:

Cyntony Corporation, founded in 2009, enables customers to protect their personnel and possessions by exploiting the electromagnetic spectrum. Providing specialized electronics and antenna products focused on the electronic warfare market, Cyntony is at the vanguard of a 21st century reality of conflict and security: those who dominate the electromagnetic spectrum win.
