

Materials needed:

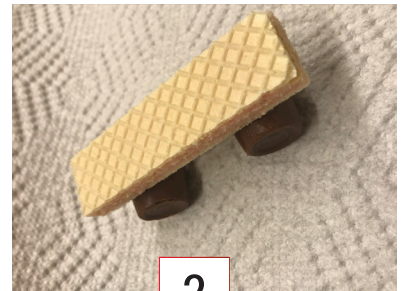

- Rolo Candies
- Frosting
- Wafer Cookies
- Mini Chocolate Chips
- Pretzel Sticks
- Plastic Knife
- Writing Gel (Optional)

EDIBLE CONSTRUCTION TRUCK

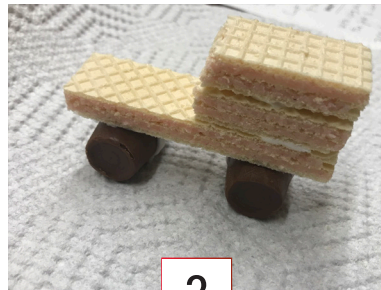

1. Lay down a paper towel before you start this project. Place two Rolos on their side, spread frosting on the larger flat side. Press the Rolos together using the sides that you put the frosting on. Repeat this with two more Rolos.
2. Add one small dot of icing on top of each set and then lay one wafer cookie on top, using the frosting to connect it the Rolos.
3. Using the plastic knife, cut one full wafer cookie in half. Apply a dot of frosting to one end of the truck bottom. Place one half of the wafer cookie on top of the icing. Place another dot on top of that half and place the remaining half on top.
4. Put two dots of frosting on the front of the truck (bottom layer wafer cookie). Push one chocolate chip into each of the frosting dots.
5. Place a few lines of frosting in the center of the truck bed. Place three pretzels across the frosting and stack two more on top of that. Use more frosting as needed.
6. Optional Step: Add a design or color to your truck using writing gel in any color.
7. Enjoy your snack!
