

Materials needed:

- Cardboard tubes
- Scissors
- Crayons, paint, colored pencils (optional)

CONSTRUCTION PUZZLE TOWER

Examples

1. Cut the cardboard tubes into smaller pieces. Try to cut them in two different sizes.
2. Cut 4 small slits (the width of the cardboard or larger) on the top and bottom of each tube.
3. Start creating your tower by stacking tubes on each other using the slots to join the pieces together. You can create whatever you want with the tubes at this point - be creative!
4. Color, paint, decorate, or leave the tubes plain if you choose.
