

# AgileCraft® Datasheet JIRA CONNECTOR

A New Way to Approach Enterprise Agile Team Tool Integration

**80% OF AGILECRAFT'S CUSTOMERS USE OUR JIRA INTEGRATION TO KEEP TEAMS ROBUSTLY CONNECTED TO PROGRAMS, PRODUCTS AND PORTFOLIOS.**

Thousands of AgileCraft team users rely on Jira to plan and manage their sprints and programs, and rely on AgileCraft to deliver that data seamlessly and reliably all the way up to the portfolio level.

**Only AgileCraft's T-Rex technology helps you make your integrated Jira team data *better*.**

At AgileCraft, our mission is to seamlessly connect teams and their work items up to programs and portfolios. With Jira, we offer varying options that go beyond simply mapping fields and transferring data, and include logic to normalize anomalies and correct for human error. We monitor performance to ensure a reliable, timely, accurate, bi-directional synchronization.

## OUR UNIQUE APPROACH TO INTEGRATION

### SPECIALIZED DATA HANDLING

We've developed specialized tools that prepare and "clean" your Jira data prior to import into AgileCraft, leaving it more accurate and complete than when you started. Our integration fills in the gaps where data is missing.

### EASY CONFIGURATION

We've worked with hundreds of customers to connect with Jira installations of all shapes and sizes, and have developed custom tooling to make every integration a snap.

### SINGLE VENDOR

Our natively developed Jira connector is built in house and delivers functionality that deeply integrates with our solution and is vigorously supported by our team.

### FLEXIBLE

We offer over 30 options beyond simple field mapping that allow you to customize our connectors to support your processes.\*

### COST EFFECTIVE

Each license package includes one Jira connector installation, completely free of charge for the lifetime of your contract. Additional connectors for separate Jira installations are competitively priced.

### MARKET PROVEN

Our Jira connector is proven to work at scale, and performs robustly in the long term. We have many thousands of enterprise customers that have used our Jira connector for years.

\* AgileCraft is continually developing new features based on real-life scenarios to make your data more reliable. For example, we enable the automatic addition of start and end dates to future sprints in Jira when they are missing, or the option to add a user to a team if their assigned work item is synced and that user isn't on the team already. No other EAP solutions offer these capacities.

# AgileCraft® Datasheet: Jira Connector

## Preparing Your Data: Jira Export Tool (JET)

### WHAT?

The Jira Export Tool (JET) is a Windows executable application developed alongside our Jira connector to analyze your existing Jira data and make recommendations to ensure your data is complete, up to date, and ready to use with your AgileCraft installation.

### WHY?

JET helps you improve the integrity of your existing data, making Jira projects more accurate and efficient. It provides quick and simple recommendations about what it will take to make your Jira data more consistent while optimizing your team's experience with AgileCraft.

## KEY BENEFITS OF THE AGILECRAFT JIRA EXPORT TOOL

Evaluates board health and gives insight into any clean-up work that may need to be performed prior to data import.

Generates a report of recommendations that will improve the health of your Jira data and boards prior to import into AgileCraft.

Guides you through the data clean-up process with an easy-to-use wizard using your Jira login and credentials.

Previews your Jira team data inside an AgileCraft environment so that you understand what it will look like to all users.

To successfully integrate Jira at scale, automated intelligence is required to normalize the information for consumption. At AgileCraft, our market-proven team tool integrations are based on our experience with thousands of users. They are designed specifically to flexibly handle and correct inconsistencies in integrated data.

### AgileCraft® at a Glance

AgileCraft® delivers the most comprehensive software solution available for scaling Agile to the enterprise. AgileCraft transforms the way organizations enable and manage Agile productivity across their enterprise, portfolios, programs, and teams by aligning business strategy with technical execution. The AgileCraft platform combines sophisticated planning, analysis, forecasting, and visualization with robust, multi-level collaboration and management.
