

FCC COVID-19 TeleHealth Program Quick Guide

According to FCC Officials, there are three steps interested providers can take immediately to prepare and apply for the COVID-19 Telehealth Program:

1. Obtain eligibility determination from the Universal Service Administrative Company for each health care provider site that is included in their application.
 - Sites that have already approved in the existing Rural Health Care program can use this eligibility, otherwise will need to apply via FCC form 460.
2. Obtain an FCC Registration Number in the Commission Registration System. You can do so [here](#).
3. If you have not done so already, register with [System for Award Management](#).
 - Only those registered through the System for Award Management will be able to receive funding.
 - [AMA's best practices for telehealth deployments](#).

After these three steps have been completed, you may then submit an application and request funding through the following [link](#) once applications can be accepted for filing.
